As your 2000 Ford Expedition ages, the air conditioning unit will gradually lose its ability to cool the cabin of the vehicle. This is most often because the air conditioner unit needs to be recharged with refrigerant. The refrigerant cools the air that the blower forces into the vehicle. While a repair shop can recharge the air conditioner unit, you can do it much more cheaply yourself.

How To Recharge 2000 Ford Expedition A C

Hi, I recently bought a 2004 (late model 2003) Expedition 4.6l. Wouldn't start and it turned out to be the R303 relay issue. (\$22 later, runs like a champ!) The previous owner told me that the ac didn't work. I hooked up my gauge set to it and found that there was no pressure/no refrigerant in it.

2000 Expedition Ac Recharge - vokdsite.cz

Recharging the freon in your AC system is an inexpensive and easy first step to restoring the cooling capacity of your A/C system. Most refrigerants include a leak sealer that will seal small leaks in addition to filling the R134a refrigerant. The A/C system in your Expedition consists of a compressor that is belt-driven, an evaporator and freon.
