By the award-winning author of East of the Sun, " a powerful and memorable novel " (Publishers Weekly) about the forbidden love between a young Indian doctor and an English midwife. Oxfordshire, 1947. Kit Smallwood, hiding a painful secret and exhausted from nursing soldiers during the Second World War, escapes to Wickam Farm where her friend is setting up a charity sending midwives to the Moonstone Home in South India. Then Kit meets Anto, an Indian doctor finishing his medical training at Oxford. But Kit ' s light-skinned mother is in fact Anglo-Indian with secrets of her own, and Anto is everything she does not want for her daughter. Despite the threat of estrangement, Kit is excited for the future, hungry for adventure, and deeply in love. She and Anto secretly marry and set off for South India—where Kit plans to run the maternity hospital she ' s helped from afar. But Kit ' s life in India does not turn out as she imagined. Anto ' s large, traditional family wanted him to marry an Indian bride and find it hard to accept Kit. As their relationship begins to fray, Kit ' s job becomes fraught with tension as they both face a newly independent India, where riots have left millions dead and there is deep-rooted suspicion of the English. In a rapidly changing world, Kit ' s naivet é is to land her in a frightening and dangerous situation... Based on true accounts of European midwives in India, Monsoon Summer is a powerful story of secrets, the nature of home, the comforts and frustrations of family, and how far we ' ll go to be with those we love.

Betterer om den amerikanske 7th Bombardment Group/Wing" og dens indsats under s å vel 1. som 2. verdenskrig, hvor den var aktiv b å de i Stillehavskrigen og over Europa.

This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people ' s well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports.

How capitalism first promoted fossil fuels with the rise of steam power The more we know about the catastrophic implications of climate change, the more fossil fuels we burn. How did we end up in this mess? In this masterful new history, Andreas Malm claims it all began in Britain with the rise of steam power. But why did manufacturers turn from traditional sources of power, notably water mills, to an engine fired by coal? Contrary to established views, steam offered neither cheaper nor more abundant energy—but rather superior control of subordinate labour. Animated by fossil fuels, capital could concentrate production at the most profitable sites and during the most convenient hours, as it continues to do today. Sweeping from nineteenth-century Manchester to the emissions explosion in China, from the original triumph of coal to the stalled shift to renewables, this study hones in on the burning heart of capital and demonstrates, in unprecedented depth, that turning down the heat will mean a radical overthrow of the current economic order.

This publication, prepared jointly by the WHO, the World Meteorological Organization and the United Nations Environment Programme, considers the public health challenges arising from global climate change and options for policy responses, with particular focus on the health sector. Aspects discussed include: an overview of historical developments and recent scientific assessments; weather and climate change; population vulnerability and the adaptive capacity of public health systems; the IPCC Third Assessment report; tasks for public health scientists; the health impacts of climate extremes; climate change, infectious diseases and the level of disease burdens; ozone depletion, ultraviolet radiation and health; and methodological issues in monitoring health effects of climate change.

Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.
