Entries explore the unique importance of buildings and sites, including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat. Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions. Other entries highlight remarkable stories of architectural achievement and memory, like those of Tuskegee University, a site hand-built by former slaves, or the Hiroshima Peace Memorial Park, which was built at the site of the atomic detonation. Each entry focuses on the architectural but includes strong consideration of the social impact, importance, and significance each structure has had in the past and in the present.

Focusing on the meaning of space for the French and the connection between the nation's history and its geography, this is the second volume in the translation of Nora's "Les Lieux de memoire". The essays gathered here cover essential approaches to French space: external and internal boundaries, the base unit of local space, and more.

The Invention of Paris is a tour through the streets and history of the French capital under the guidance of radical Parisian author and publisher Eric Hazan. Hazan reveals a city whose squares echo with the riots, rebellions and revolutions of the nineteenth and twentieth centuries. Combining the raconteur's ear for a story with a historian's command of the facts, he introduces an incomparable cast of characters: the literati, the philosophers and the artists—Balzac, Baudelaire, Blanqui, Flaubert, Hugo, Maney, and Proust, of course; but also Doisneau, Nerval and Rousseau. It is a Paris dyed a deep red in its convictions. It is haunted and vitalized by the history of the barricades, which Hazan retells in rich detail. The Invention of Paris opens a window on the forgotten byways of the capital's vibrant and bloody past, revealing the city in striking new colors.
