Trailblazer Problems - part 1

A flashing check engine light is your Chevy

Trailblazer ' s way of saying “ I have a serious problem, don ' t ignore me ” . Most of the time, that serious problem is a misfire. This flashing light should not be ignored.

When your engine is misfiring, it is dumping raw fuel into the exhaust.

2007 Chevy

Trailblazer Engine Light

If you have the reduced engine power light, then there are going to be some diagnostic trouble codes stored in your OBD II system. This is great news, since it helps narrow down where the ECU thinks that the problem is. A good code scanner is really cheap and can make the process a whole lot smoother.
