This long out of print classic has now been revised and updated. The most comprehensive account of British cars ever published, this book presents a huge amount of historical and technical information. Nearly 700 manufacturers and 3,700 individual models are profiled, including technical specs for most cars.

No one contemplating an MGB V8 engine conversion should start the project without reading this book, which is based on the real world experience of many owners and

specialists who have re-engined MGBs in the past. Avoid expensive mistakes and pitfalls and end up with a car that performs, handle and brakes superbly by following the detailed advice compiled over many years by MGB expert, Roger Williams.

This is a poetry compilation for people that are not necessarily interested in reading poetry. The featured works range from weird to vulgar to humorous to awkward. Each poem is combined with an image, sharing the page by fighting and/or complimenting each other.

The book introduces to the reader a number of cutting edge statistical methods

which can be used for the analysis of genomic, proteomic and metabolomic data sets. In particular in the field of systems biology, researchers are trying to analyze as many data as possible in a given biological system (such as a cell or an organ). The appropriate statistical evaluation of these large scale data is critical for the correct interpretation and different experimental approaches require different approaches for the statistical analysis of these data. This book is written by biostatisticians and mathematicians but aimed as a valuable guide for the experimental researcher as well computational biologists who often lack an appropriate background in statistical analysis.
