distant future where books are burned by a special task force of firemen. 'Another indispensable classic' The Times "Ray Bradbury's gift for storytelling reshaped our culture and expanded our world' Barack Obama Guy Montag is a fireman. His job is to burn books, which are forbidden, being the source of all discord and unhappiness. Even so, Montag is unhappy; there is discord in his marriage. Are books hidden in his house? The Mechanical Hound of the Fire Department, armed with a lethal hypodermic, escorted by helicopters, is ready to track down those dissidents who defy society to preserve and read books. The classic dystopian novel of a post-literate future, Fahrenheit 451 stands alongside Orwell's 1984 and Huxley's Brave New World as a prophetic account of Western civilization's

Bradbury's powerful and poetic prose combines with uncanny insight into the potential of technology to create a novel which, decades on from first publication, still has the power to dazzle and shock.

This book investigates the meteoric rise of mobile webtoons - also known as webcomics - and the dynamic relationships between serialised content, artists, agencies, platforms and applications, as well as the global readership associated with them. It offers an engaging discussion of webtoons themselves, and what makes this new media form so compelling and attractive to millions upon millions of readers. Why have webtoons taken off, and how do users

interact with them? Each of the case studies we explore raises interesting questions for both general readers and scholars of new media about how webtoons have become a modern form of popular culture. The book also addresses larger questions about East Asia's contributions to global popular culture and Asian society in general, as well as South Korea's rapid social and cultural transformation since the 1990s. This is a significant - and understudied - aspect of the new screen ecologies and their role in a new wave of media globalisation as we approach the end of the second decade of the 21st century.

skilled professionals working for an unknown government. Suspected of being a terrorist sympathizer, Douglas was drugged and taken from his home in the middle of the night, then forced to endure brutal interrogations. His teeth were filed, his hair removed and he was left psychologically vulnerable when he was finally let go. Charged with the task of rehabilitating this unfortunate young man, the psychiatrist finds her 'non vanilla side' is not only intrigued but primed as she listens to Douglas's halting "toothless" account. Rather than reprogramming her brainwashed patient for a return to normal life, she transforms the luckless Douglas into a toy for her personal amusement. The owning of a houseboy brings to full flame her smoldering penchant for control and governance and she takes to her

new role with some enthusiasm. Douglas performs his domestic chores on her command, and while she's at work, he lies in her spare room, blindfolded, diapered and bound inside the nylon straps of the elaborate Segufix restraint system. Among the many disgusting things he'll be forced to suffer, he'll be fed a foul concoction of food deliberately made to resemble excrement. So aroused by the exhilarating arrangement with her new toy, the psychiatrist slakes her mounting sexual needs riding her trusty Sybian sex machine. It will not be long before her male companion, a barely adequate part-time lover, falls into her well-spun web of male subjugation.

The Art of Tiki is a passionate study of the Tiki idol as an art form. For the first time, contemporary Tiki art is united and presented equally with what inspired it, original mid-century Polynesian pop. Author Sven Kirsten combines his first-hand experiences in exploring the birth of Tiki style with his intimate knowledge of the Tiki Revival, painting a vivid, visually arresting portrait of a unique, always new art genre. The Art of Tiki is published in conjunction with the 20th Anniversary Tiki Art Exhibition at La luz de Jesus Gallery

"Trisk and her hated rival Kal have the same goal: save their species from extinction. But death comes in the guise of hope when a genetically modified tomato created to feed the world combines with the government's new tactical virus, giving it an unexpected host and a mode of transport. Plague rises, giving the paranormal species the choice to stay hidden and allow humanity to die, or to show themselves in a bid to save them. Under accusations of scientific misconduct, Trisk and Kal flee across a plague-torn United States to convince leaders of the major paranormal species to save their supposedly weaker kin, but not everyone thinks humanity should be saved"--
