Call To Arms is the fourth novel in the award-winning historical / nautical fiction series from William C. Hammond. Along with the other novels in the Cutler Family Chronicles – most recently For Love of Country and The Power and the Glory – it features the epic saga of the seafaring Cutler family of Hingham, Massachusetts and an ever expanding cast of characters. Among these characters are real historical figures including Capt. Edward Preble, Lt. Stephen Decatur, Lt. Richard Somers, Samuel Coleridge, Bashaw Yusuf Qaramanli, and Adm. Horatio Lord Nelson. Interwoven with these historical characters is a fast-paced and gripping plot that takes the reader from Java in the Dutch East Indies to New England at the start of the nineteenth century, and on to Gibraltar, Tripoli, Malta, Sicily, Alexandria and Cairo. Historic events depicted in the novel have been subjected to intense research and have been vetted by historians.

The colossal scale of World War II required a mobilization effort greater than anything attempted in all of the world's history. The United States had to fight a war across two oceans and three continents--and to do so, it had to build and equip a military that was all but nonexistent before the war began. Never in the nation's history did it have to create, outfit, transport, and supply huge armies, navies, and air forces on so many distant and disparate fronts. The Axis powers might have fielded better-trained soldiers, better weapons, and better tanks and aircraft, but they could not match American productivity. The United States buried its enemies in aircraft, ships, tanks, and guns; in this sense, American industry and American workers, won

World War II. The scale of the effort was titanic, and the result historic. Not only did it determine the outcome of the war, but it transformed the American economy and society. Maury Klein's *A Call to Arms* is the definitive narrative history of this epic struggle--told by one of America's greatest historians of business and economics--and renders the transformation of America with a depth and vividness never available before.

The moment we come to faith in Jesus Christ, we are enrolled into battle against the unholy trinity; the world, the flesh, and the devil. And all too many men are AWOL (absent without leave) in their walk with the Lord. Spiritually, they are missing in action. *A Call to Arms* is about the challenges all Christian men face in this battle and the ways our enemy goes about to subvert our growth and obedience to the call of God in our lives. It is addressed to Christian men who have struggled in their walk with the Lord, just as the author, Stephen, has. The battle with our old nature is honestly addressed, as are the brokenness of divorce, loneliness, and other areas of woundedness within us. A look at the beauty of brokenness is addressed, noting that there are redemptive qualities suffering can bring about in our lives. Renewal for the hearts, minds, and souls of men can come only by the transforming power of the Word of God. Included after each chapter is a 5-day study guide to help us to examine our own heart and deepen our understanding of both the material covered and about ourselves.

From multiple New York Times best selling author David Weber and #1 New York Times best selling author Timothy Zahn. NEW ENTRY IN BEST-SELLING SERIES. Book #2 in the Manticore Ascendant series, set in David Weber's Honorverse. Lieutenant Travis Long of the Royal Manticoran Navy is the sort of person who likes an orderly universe. One where people follow the rules. Unfortunately, he lives in the real universe.

The good news is that Travis is one of those rare people who may like rules but has a talent for thinking outside them when everything starts coming apart. That talent has stood him  $\frac{3}{4}$  and the Star Kingdom  $\frac{3}{4}$  in good stead in the past, and it's one reason he's now a \_mustang, Ó an ex-enlisted man who's been given a commission as a King's officer. The bad news is that two of the best ways of making enemies ever invented are insisting on enforcing the rules . . . and thinking outside them when other people don't. Travis learned that lesson the hard way as a young volunteer in basic training, and he knows that if he could just keep his head down, turn a blind eye to violations of the rules, and avoid stepping on senior officers' toes, he'd do just fine. But the one rule Travis Long absolutely can't break is the one that says an officer in the Royal Navy does his duty, whatever the consequences. At the moment, there are powerful forces in the young Star Kingdom of Manticore's Parliament which don't think they need him. For that matter, they're pretty sure they don't need the Royal Manticoran Navy, either. After all, what does a sleepy little single-system star nation on the outer edge of the explored galaxy need with a navy? Unhappily for them, the edge of the explored galaxy can be a far more dangerous place than they think it is. They're about to find out why they need the Navy . . . and how very, very fortunate they are that Travis Long is in it. This is a comprehensive account of how the British Army coped with and adapted to the enormous challenges and pressures of the First World War -- the first major continental war that the army had had to fight for almost a hundred years. Following the course of the War, both on the Western Front and in other theatres, Charles Messenger tells how the British Army managed the challenges of command, training, technology and new weapons of war. He examines officer selection, medicine, discipline, the manpower crisis of 1918, the integration of women into the forces and many other topics. Based on years of original research, this will become the standard work of reference on the organization and administration of the biggest army Britain has ever put into the field.
