Revision Notes on Solution: A solution is a homogeneous mixture of two (or more) substances, the composition of which may vary between certain limits. A solution consisting of two components is called binary solution. The component which is present in large quantity is called solvent and the component which is small in quantity is called solute. If both components are in same physical state.

Problem and solution is very closely related to cause and effect, but the big difference is the solution. This is something I'll write on the slide and I'll expect the kids to write it in their notes. When I get to the slide with the problem and solution paragraph, I'll ask students to read it and find the problem and
