Steel, alloy of iron and carbon in which the carbon content ranges up to 2 percent (with a higher carbon content, the material is defined as cast iron). By far the most widely used material for building the world ' s infrastructure and industries, it is used to fabricate everything from sewing needles to oil tankers.

~~steel | Composition, Properties, Types, Grades, & Facts ...~~

Steel is an alloy of iron with typically a few percent of carbon to improve its strength and fracture resistance compared to iron. Many other additional elements may be present or added. Stainless steels that are corrosion and oxidation resistant need typically an additional 11% chromium. Because of its high tensile strength and low cost, steel is used in buildings, infrastructure, tools, ships ...

Directed by Stefano Mordini. With Michele Riondino, Vittoria Puccini, Matilde Giannini, Anna Bellezza. Anna and Francesca are both fourteen years old and live in a working-class neighborhood of Piombino. Face to them, off the shores, they can see the Elba Island with its gorgeous beaches whereas behind them stands the steel plant, which shrinks the lives of the district dwellers.
