Domestic-sized air conditioning systems are also available in different levels of complexity: Simple systems designed for a single room application will have one outdoor unit and

Access Free Air Conditioning

one indoor unit. Best

These are known as
single room air

conditioners; The

next option is a split
air conditioner which
is one outdoor unit
with two, three or
four indoor units.

They are all on or all
off, and will either all
be in heating or
cooling mode.

In more temperate climates, you can turn the air conditioner off at night and let ceiling or floor fans provide do all the work. The energy used by fans is far less than that of air conditioners. If you live in a warmer

Access Free Air Conditioning

climate, fans can still provide a comfortable breeze at night and may allow you to set the air conditioner above 78 degrees saving a great deal of energy.
