Alfa Romeo All-Alloy Twin Cam Companion provides an excellent technical and historical overview of the Giulietta and Giulia family of small sporting roadsters, coupes and sedans. If an Alfa Romeo had one of the all-alloy four-cylinder engines and reached

production, it's covered in the Alfa Romeo All-Alloy Twin Cam Companion. That means that even after the Giulia name was dropped - particularly in the United States - the many variants of Duetto, GTV, Berlina and Alfetta are covered, from 1954

through 1994 when the final Alfas- including the four-cylinder Spiders- were sold in the United States.

When it came to Alfa Romeos, author Pat Braden was an enthusiast's enthusiast. Pat didn't just write about Alfas - he lived and breathed Alfas. From the

mid-1950s when he first owned a Giulietta Sprint until his death in August 2002, Pat had owned scores of Alfa Romeos, ranging from a 6C 1750GTC and an 8C 2300 to 1900s, Giuliettas, Giulias and countless later models. Alfa models are discussed according

to history, engine, chassis and trouble spots. Without being a repair manual, this book contains important technical information needed to understand and enjoy one of these Alfas, as well as to perform many minor repair, maintenance, and service tasks.

Braden starts with a brief overview of Alfa Romeo history, followed by a look at Alfa's presence in America. He also explores the major models of coupe, spider and berlina that used the all-alloy four-cylinder, as well as the limited production

variants. Of course, he also gives much attention to that mighty engine itself. Braden explains the design and history of the engine, as well as exploring trouble spots and offering extensive advice and tips. Additional technical sections focus on the fuel system,

transmission, brakes and chassis, not to mention overall restoration. Alfa Romeo All-Alloy Twin Cam Companion is a key to getting the absolute maximum benefit and enjoyment out of Alfa.

The Alfa Romeo 105 series Spider

is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced

including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the

105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most

When you think of Alfa Romeo, it is the Italian's company's sports cars, above all, that fire the imagination, since they encapsulate everything that is

great about the brand. In successive dynasties of fixed-roof coupés and convertible spiders, Alfa Romeo has built one of the greatest canons of work of any car maker in the world. The appeal of Alfa Romeo's sports cars is, of course, partly down to

their aesthetic eminence. A host of talented designers created their best work for Alfa – Giorgetto Giugiaro's Giulia Sprint GT, Franco Scaglione's 33 Stradale and Pininfarina's Duetto Spider, to name but a few – but style was only ever a part of the

story. Drivers love Alfa Romeo coupés and spiders, too, because technically speaking, these cars were in a class of their own. Alfa Romeo consistently employed elements from much more expensive machinery, democratising them into its sports

cars. One can cite gearboxes with multiple ratios, all-round disc brakes, lightweight aluminium engines, perfectly balanced weight distribution and many more. Alfa Romeo Coupes and Spider In Detail since 1945 celebrates Alfa Romeo's most
