Sous la direction de R. Enthoven, une équipe de professeurs de philosophie propose une dizaine de sujets de dissertation de philosophie à destination des élèves de Terminale et pour chacun un plan détaillé et une dissertation modèle. A l'issue de l'exercice, le lecteur aura appris à se construire un mode de réflexion et les étudiants auront les clefs et la méthode pour aborder les grandes questions que pose la philosophie et rédiger la dissertation idéale.

The Landscape Photographer of the Year competition is the brainchild of Charlie Waite, one of today's most respected landscape photographers. With AA Publishing, he created this prestigious competition and award with a total prize fund exceeding 20,000, coupled with an exhibition in London showcasing the best of the competition. The full-color book showcasing the best entries has been hugely successful in its first 10 years. Like the others before it, the 11th edition features both classic shots of verdant rural countryside and stark urban landscapes capturing the beauty and diversity of 21st century Britain.

The way in which the ruling ideas of a social system are related to structures of class, production and power, and how these are legitimated and perpetuated, is fundamental to the sociological project. In this second edition of this classic text, which includes a new introduction by Pierre Bourdieu, the authors develop an analysis of education (in its broadest sense, encompassing more than the process of formal education). They show how education carries an essentially arbitrary cultural scheme which is actually, though not in appearance, based on power. More widely, the reproduction of culture through education is shown to play a key part in the reproduction of the whole social system. The analysis is carried through not only in theoretica

The volume investigates the different alignment patterns in Indo-Aryan and shows that the variation of alignment patterns in Indo-Aryan goes beyond the opposition between accusativity and ergativity. The book includes a thorough discussion of the concepts and terminology relating to alignment patterns. The study draws extensively on new language data from Indo-Aryan. It includes discussions of examples taken from Hindi, Sanskrit, Apabhramsa, Asamiya, Bangla, Oriya, the Bihari languages, Nepali, Kashmiri, Sindhi, Siraiki, Poguli, Gujarati, Punjabi, Marwari, Harauti, the Hindi varieties, and Shina. The volume offers a comprehensive overview of various alignment patterns in Indo-Aryan based on a wide range of data. By focusing on lesser known Indo-Aryan languages, the study questions the central position of Hindi-Urdu in the research on ergativity. Each language is treated in its own right, with a focus on language-specific data and analyses, rather than relying on a notional format that starts with pre-established linguistic concepts. In accordance with this methodology, much attention is paid to "indirect" connections between ergative constructions and other syntactic and semantic patterns in the various languages.

The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

Under the direction of Pierre Bourdieu, a team of 22 researchers spent three years studying and analyzing the new forces of social suffering that characterize contemporary societies.
