First, scientists are pretty sure the Earth's core is about 80 percent iron. How they know that is a series of educated guesses.

### Answers about Science

Many rocks, as well as water and oil reservoirs, are at great depths in the Earth, while air masses circulate at vast heights above it. Thus, the Earth scientist has to have a good three-dimensional perspective. Second, there is the fourth dimension: time. The Earth scientist is responsible for working out how the Earth evolved over millions of years.
