Approved for AMA PRA Category 1 Credits through July 31, 2018 for Part A books, December 31, 2018 for Part B books.

This comprehensive, yet practical, text is a ready collection of the most up-to-date information on primary CNS tumors. Authored by a carefully selected group of the world's leading clinicians and scientists, the book is divided into three sections. The opening chapters cover general principles, including epidemiology, pathogenesis, tumor stem cells, supportive care, complications of therapy, and quality of life. The remaining two sections are comprised of treatment-oriented chapters covering the spectrum of gliomas and rarer tumor types. Each of these chapters presents multi-disciplinary therapeutic approaches and addresses specific disease concerns. Throughout, the authors incorporate the cutting-edge advances in molecular biology and genomics that are revolutionizing neuro-oncology. The result is an important clinical resource which provides evidence-based data and interpretation essential to intelligent therapeutic decision making.

Companion volume to: Mayo Clinic internal medicine board review, 10th ed. c2013.

Designed for medical students on their clerkship rotation, this new edition of MKSAP for Students 4 includes more than 400 new, patient-centered self-assessment questions and answers, focused on important internal medicine information from the Core Medicine Clerkship Curriculum Guides Training Problems. The accompanying CD-ROM automatically tracks progress, assesses areas for further focus, enables category-based and random question ordering, and links directly to PubMed.
