Probably the first authoritative study of one of the most colourful characters in Indian history Farzana tells the rags-to-riches story of one of the most colourful characters in Indian history. Her troops often

held the balance of power. Her hospitality was the talk of the age. And, converting to Christianity, her piety found her corresponding with the Pope and building a church that may still be the largest basilica in the country.

With independence, India experienced a dramatic social rupture but also a recuperation of political autonomy and a new sense of optimism that promised opportunities. The country became a crucible for experimentation in modern and utopian architecture with new buildings, cities and museums giving public face to the nation. Indian architects and architectural projects claimed international attention, and a generation of women entered professions such as architecture and design that had previously been closed to them. They emerged as a pronounced political force, and important patrons of art, architecture and public space. The mid-19th and 20th centuries saw a significant increase in women acting as arbiters of taste and shapers of the built environment. The emerging groups of female designers and female patrons were enabled by new norms for women. The essays in this volume address these developments, posing the important question: did, and do, women produce art and architecture that reflect a feminine perspective? How did women, otherwise invisible and denied attention in the public sphere, gain voice? The writers look at these questions through both the political frame of gender as well as through family lineage and dynastic connections, and their importance in women's patronage of the arts. that exists on the culture and the agency of the courtesan, this analysis would reinterpret the status of the courtesan figure within the domain of feminist theories and self-assertion. The female desire for autonomy, according to Elaine Showalter, defines a female exclusivity in terms of the dynamic phase, which is a combination of the feminine conflict between self-fulfillment and duty, the feminist political consciousness, and the female desire for autonomy. If one operates the courtesan figure in the Showalter domain, then the means to resist gender hierarchies through literary practices lie in a combination of both demand for exclusivity and real struggle into a truly subversive aesthetic which would have allowed the courtesan to have walked the corridors of power. Juliet Mitchells argument states that the gendered treatment of women came into existence through the ideological form of the novel, with females constructing themselves as the women they are under bourgeois norms by reading and writing novels. Rereading the Silencing of the Sirens would uncover another such exclusive female tradition studying the female consciousness from the courtesans point of view.

Who says women don't go to war? From Vikings and African queens to cross-dressing military doctors and WWII Russian fighter pilots, these are the stories of women for whom battle was not a metaphor. The woman warrior is always cast as an anomaly—Joan of Arc, not GI Jane. But women, it turns out, have always gone to war. In this fascinating and lively world history, Pamela Toler not only introduces us to women who took up arms, she also shows why they did it and what happened when they stepped out of their traditional female roles to take on other identities. These are the stories of women who fought because they wanted to, because they had to, or because they could. Among the warriors you'll meet are: \* Tomyris, ruler of the

Massagetae, who killed Cyrus the Great of Persia when he sought to invade her lands \* The West African ruler Amina of Hausa, who led her warriors in a campaign of territorial expansion for more than 30 years \* Boudica, who led the Celtic tribes of Britain into a massive rebellion against the Roman Empire to avenge the rapes of her daughters \* The Trung sisters, Trung Trac and Trung Nhi, who led an untrained army of 80,000 troops to drive the Chinese empire out of Vietnam \* The Joshigun, a group of 30 combat-trained Japanese women who fought against the forces of the Meiji emperor in the late 19th century \* Lakshmi Bai, Rani of Jhansi, who was regarded as the “bravest and best” military leader in the 1857 Indian Mutiny against British rule \* Maria Bochkareva, who commanded Russia’s first all-female battalion—the First Women’s Battalion of Death—during WWII \* Buffalo Calf Road Woman, the Cheyenne warrior who knocked General Custer off his horse at the Battle of Little Bighorn \* Juana Azurduy de Padilla, a mestiza warrior who fought in at least 16 major battles against colonizers of Latin America and who is a national hero in Bolivia and Argentina today \* And many more spanning from ancient times through the 20th century. By considering the ways in which their presence has been erased from history, Toler reveals that women have always fought—not in spite of being women but because they are women.

The essays in the volume deal with a broad range factors integral to Indian history in the early modern era. They unfold many facets of the trade, politics and society of the country and offer new perspectives which will help dispel some long held misconceptions. The first part of the book is concerned mainly with trade and commerce in Bengal while subsequent chapters provide an extensive survey of maritime trade in the Indian Ocean and the unique contribution
