In this text "students will see God's power and glory in creation as they learn about cellular biology, genetics, taxonomy, microbiology, botany, zoology, and human anatomy. When studying topics such as Creation and evolution, human cloning, abortion, and stem cell research, students are pointed to Scripture as the ultimate authority and are encouraged to develop a biblical perspective about these topics" --

cell biology, genetics, the history of life, microbiology, botany, zoology, ecology, and human anatomy and physiology, all within a biblical framework. -

The Biology (5th ed.) Student Text takes the student on a quest to understand God's living world, from the microscopic world of the cells to the macroscopic world of plants, animals, and the human body. Clear scientific images help them picture the cell's workings, and galleries of photos in every chapter give them a sense of the classification of life. Case studies, webquests, lab activities, and questions help students think like scientists and understand that biology makes sense from a biblical perspective. - Publisher.

Chemistry, 4th ed., gives students the tools to build an understanding of atomic structure, chemical composition, and chemical reactions. Throughout the course, students will put these tools to work in different fields of chemistry in ways that can show them the impact that chemistry can have to help people and to wisely use God's world to glorify Him. This new edition features new content about semiconductors and nuclear chemistry as well as additional biblical worldview-shaping sections that help students to think through common debates among scientists. - Publisher.
