2002 Buick lesabre check engine light flashing—CarGurus

2002 Ford Ranger 3.0 V6 Had a flashing check engine light last night on the highway for about ten minutes, then went away. I didn't notice any problems with how the engine sounded or felt at the time, though. The air filter was VERY dirty, changed it today. The fuel filter probably needs to be replaced as well. Would this be the cause?

2002 Ford Ranger 3.0 V6 Had a flashing check engine light—

Silverado Check Engine Light Flashing Due to Ignition Issues. The ignition system is the most common reason that the check engine light will flash. The ignition system consists of spark plugs, plug wires, and the ignition coil packs (older vehicles have a distributor that has the same function as coil packs). These parts work in concert to ...

Chevy Silverado: Flashing Check Engine Light Diagnosis—

Check engine light flashing car shaking is a clear sign of trouble. Vibration or shaking may be caused by misfires, poor fuel pressure, or faulty spark plugs. You should also know that a defective idle air control valve might make the engine idle drop significantly. This may cause the motor to vibrate or shake abnormally.

Why is My Check Engine Light Flashing and Car Shaking?

A flashing check-engine light generally indicates that there is a failure in the emission control system. The emission control system contains an array of sensors that work to reduce the amount of pollution released into the air. An oxygen sensor reads the air and fuel mixture and lights up when it is out of range.

Why Is My Check Engine Light Flashing? | It Still Runs

The check engine light is a special mechanism that alerts the driver of any issues the engine's operating systems may be experiencing. The light turns on when a code from one or more of these systems is triggered and will not turn off until the problem is repaired or the codes are erased.
