As you have probably noticed, there are quite a few investing books out there. Many of them were written by some of the world's greatest investors. So, why should you read our book? Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. The Little Book of Investing Like the Pros was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices. Our practical approach is designed to help demystify the investing process, which can be intimidating. This training will help set you apart from others who are largely flying blind. Pilots require extensive training before receiving a license. Doctors must graduate medical school, followed by a multi-year residency. Even those providing professional investment advice require certification. But, anyone can buy a stock without any training whatsoever. While buying stocks on a hunch and a prayer may not endanger your life, it can certainly put your finances at risk.

It takes imagination to create something that is meaningful and to do it you need an inspiring creative brief. We know, however, that writing a brief is a challenge. A good one not only clearly sets out business objectives, potential strategy, and target audience insights, it also, just as importantly, inspires people. It's a daunting task, because when writing a brief, you know you are directly influencing the campaign's potential. This book therefore has two objectives: To facilitate collaboration between business-minded people and creative people, so that a stimulating brief is written, inspiring those responsible for producing a great campaign. To help ensure that the brief is clear, informative and has well-defined objectives.

Life is indeed a game that we all play to pass time; simply a series of days strung together, made up of how you planned or decided to spend the moments. Like any game how well it is played or whether life's circumstances are interpreted accurately, then used to the best advantage, makes losers and winners to varying degrees. Senseless insanity is alive and well within the world. The world is awash with unruly forces, that if not intent upon harming you do desire to become a destabilising force, either temporarily or over the long term. We are all participants in a charade, how life evolves and turns out all depend on how well the game is played. It is not wise or ideal to treat life like a game of chance, a random roll of the dice that can determine unpredictable outcomes. The cost of success is the careful application of well thought out concepts and ideas. Like any game preparation is critical; understanding the rules, knowing how to manipulate the dynamics at play efficiently to ones own advantage, understanding the intricacies of the rules and how to capitalise upon or create opportunities, pursuing whatever circumstances are present to maximise whatever potential exists to the best advantage. The potential opportunities in life are only limited by the inability to firstly comprehend them and secondly to fully utilise personal abilities to maximise the potential that is available. Don't wait for special times to evolve, rather create them in accordance with your true desires to experience what you wish to make real. Much like any game, the game of life has things that can be obtained, or things that can be lost. How the game is played, the value of the stakes, the opposing factions all come to dictate an outcome, be that favourable or lacking any resemblance of being lucky. A life lived based upon any reliance on luck or fate being favourable is tempting only to the over optimistic, or those extremely lucky ones or who were fortunate in the past and believe that good fortune will continue in the future. While it takes resources to control the world, the control of your own specific world environment is really within your potential to achieve. How you

choose to control your world, as well as to what extent your desires are put into action, determine whether your life will meet your wishes or not. The amount of thought and energy you exhort, the persistence of that effort, all comes to determine whether and to what degree what you want is what you actually get. In life you may win or lose at times, it's basically just like playing a game; the right mentality is changing the wheel of life by trusting and ensuring you will win just the same.

**How To Develop The Leadership Characteristic Already Within You** Leaders change the world. Leaders inspire others. Leaders live their passion Vision Knowing what you want and where you are going is vital. The next step is picturing, in your mind, exactly what you want down to the smallest detail. However, the most important piece of the puzzle is your WHY - the reason you want whatever it is you want. Without that it's game over. Courage You may have your purpose, but do you possess the guts to tell the world and follow it through. Courage needn't be loud and aggressive, more often it's a voice in your mind which compels you to keep trying. Integrity Are you honest? Do you speak what you believe? Do you set the example for others to emulate? Are you a person of their word? Are you committed to becoming more than what you already are? Did you answer yes to all the above? Integrity is built upon these questions, leadership is built upon integrity. Humility The initial response to leadership and humility brings up images of oil and water - they cannot go together. On a second look you will find humility running through every great modern day leader. The role of a leader is to serve the people following them. Can you think less of yourself and more of others, to best meet their needs? It's not as easy as it sounds. Self Discipline If you cannot control yourself you will NEVER have the control of others. You will never be able to keep a team around you who complement your strengths and enhance your weakness. Without those people the dream is just that, a dream, and will never become reality. Planning The first words that come to mind are usually -not again- accompanied with an eye roll. Many great people have said what I'm about to say - if you fail to plan you plan to fail. A plan is like the foundations when building a house. Without them all the work that's supposed to be carried out on top, will eventually collapse on itself. Influence The number one skill needed to be a great salesman and one of the 12 pillars of leadership. Influence is the ability to help people see what you see, to paint them the picture of how you see the future and for them to say -I want that too!- Decision My parents can't make a decision and it's frustrating as hell, especially when we go out for a meal. I ask them where they would like to go, I always get the same response -I'm easy-. As mad as this makes me I realised - people will not follow a leader who cannot decide what to do. Listening Sorry to break your bubble, but you are not going to have all the great ideas. you are one mind among billions, someone else will have the same motives as you and will be able to help. Listen to them and by listen I don't mean hear what they say, actually listen with the intent to understand. Responsibility Can you handle it? The pressure, the weight of the dream on top of your shoulders. If you can't, would you turn down a new opportunity? Many people do! Communication You have the vision, the courage and the best plan since Steve Jobs released the iPhone, but can you tell me so they fully understand it without it taking a long time? It's not easy, but if it was everybody would be able to do it. Mentoring Help the people who follow you by sharing what you know. Not only do they learn, every time you share an idea you get to hear it again and again and again - repetition is the mother of skill.
