BSA Rebuild Services. We provide full engine rebuild services for your BSA motor. BSA's have there own quirks, of course, but in the end it is a similar animal to the other Brit motors and we approach it the same way with recommendations for upgrades and "new metal" when necessary. We can source the necessary parts and services to support your rebuild or restoration of your BSA.

Description. 25 Page – PDF Download – Complete Series – BSA A10 Engine Rebuild. "Brian Wooley's BSA A10 restoration takes a turn to the good this month with the arrival of his rusty engine at SRM Engineering in Cardiff. SRM's Steve McFarlane is the engine expert – John Nutting provides his words. The appeal of early British parallel twins is that they're so simple in construction – but that doesn't mean they can be treated badly.

BSA Engine Parts - Classic British Spares

Common BSA engine issues include worn bushings, blown head gaskets and loss of oil pressure. "Motorcycle Repair Devon" can rectify these issues and help prevent them from coming back for years with our expert knowledge and professional engine rebuilds. "Motorcycle Repair Devon" is often involved in engine rebuilds for BSA A7, A10, A50, A65 and A70's, providing a service you can rely on for full engine rebuilds.

BSA Engine Rebuilds Devon - Motorcycle Repair Devon

SRM Engineering offer a Quality and Professional Engine and re-conditioning service. BSA were aware of the shortcomings of the crankshaft bush and developed their own crankshaft oil feed system for use with their racing engines. Our Needle roller and oil end feed conversion completely eliminates the problems associated with the timing side bush. The bush is replaced by a combined ball and needle roller bearing which withstands substantial radial and axial load, the combined bearing ...

Engine Rebuilding - Triumph Classic Motorcycles

The BSA manual specifies an end gap of .009" (minimum) .013" (maximum). If the end gap is .007" or less, the ends must be filed carefully to obtain the correct minimum gap. When refitting the piston to the conrod it is most important to have the piston ring gaps at the front, ie numbers one and three will appear nearest the front on the nearside of the engine, as below:
