This book is about the desperate economic situation which the Movement for Multiparty Democracy inherited and the unenviable task of turning it into a viable economy and the difficult decisions that President Frederick Chiluba had to take.

If life is a journey, then consider this book part of your map, and let the humorous and inspiring quotes within lead you down the path of documenting 1,826 days of your life.The five-year journal is not a new trend. A century ago they were all the rage, and those who still keep these journals understand why. They are a quick reference to your triumphs, heart breaks, and periods of listlessness. They provide strange insights like perhaps noting the fact that the first snow came on the same day three years in a row at your house. Or maybe you just learn at the end of a day that exactly one year ago you went to the same restaurant with the same person one the same day and ordered the same thing off the menu. What are the odds?Whether monumental or mundane, it's always fun to look back and see how far you've come. This journal can do that and more for you, so start yours today or give it as a gift. Five year journals are a very healthy addiction.Please note: Diehards often remove the spine and replace it with their preferred type of ring binding to help their journals withstand the wear and tear of time.

"This story, told by a master teller of such things, does more than take you inside the cages, fences, and walls of a zoo. It takes you inside the human heart, and an elephant's, and a primate's, and on and on. Tom French did in this book what he always does. He took real life and wrote it down for us, with eloquence and feeling and aching detail." -Rick Bragg, Pulitzer Prize-winning journalist and bestselling author "An insightful and detailed look at the complex life of a zoo and its denizens, both animal and human." -Yann Martel, author of Life of Pi and Beatrice and Virgil Welcome to the savage and surprising world of Zoo Story, an unprecedented account of the secret life of a zoo and its inhabitants. Based on six years of research, the book follows a handful of unforgettable characters at Tampa's Lowry Park Zoo: an alpha chimp with a weakness for blondes, a ferocious tiger who revels in Obsession perfume, and a brilliant but tyrannical CEO known as El Diablo Blanco. The sweeping narrative takes the reader from the African savannah to the forests of Panama and deep into the inner workings of a place some describe as a sanctuary and others condemn as a prison. Zoo Story shows us how these remarkable individuals live, how some die, and what their experiences reveal about the human desire to both exalt and control nature.

The 1940s offered ever-increasing outlets for writers in book publishing, magazines, radio, film, and the nascent television industry, but the standard rights arrangements often prevented writers from collecting a fair share of the profits made from their work. To remedy this situation, novelist and screenwriter James M. Cain (The Postman Always Rings Twice, Double Indemnity, Mildred Pierce) proposed that all professional writers, including novelists, playwrights, poets, and screenwriters, should organize into a single cartel that would secure a fairer return on their work from publishers and producers. This organization, conceived and rejected within one turbulent year (1946), was the American Authors' Authority (AAA). In this groundbreaking work, Richard Fine traces the history of the AAA within the cultural context of the 1940s. After discussing the profession of authorship as it had developed in England and the United States, Fine describes how the AAA, which was to be a central copyright repository, was designed to improve the bargaining position of writers in the literary marketplace, keep track of all rights and royalty arrangements, protect writers' interests in the courts, and lobby for more favorable copyright and tax legislation. Although simple enough in its design, the AAA proposal ignited a firestorm of controversy, and a major part of Fine's study explores its impact in literary and political circles. Among writers, the AAA exacerbated a split between East and West Coast writers, who disagreed over whether writing should be treated as a money-making business or as an artistic (and poorly paid) calling. Among politicians, a move to unite all writers into a single organization smacked of communism and sowed seeds of distrust that later flowered in the Hollywood blacklists of the McCarthy era. Drawing insights from the fields of American studies, literature, and Cold War history, Fine's book offers a comprehensive picture of the development of the modern American literary marketplace from the professional writer's perspective. It uncovers the effect of national politics on the affairs of writers, thus illuminating the cultural context in which literature is produced and the institutional forces that affect its production.

The most accurate Algonquin Provincial Park map available. It features current and historic portages, campsites, and a very large mount of supplementary information.It's also available as a free download at http://www.algonquinmap.com

The details of Abhishiktananda's life and spiritual experiences are narrated through his own words. The film covers his awakening in India and deep inquiry into Advaita Vedanta within a Christian context.

Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providingpractical advice on the full range of interventions forpsychosocial rehabilitation. It contextualises the interventionsdescribed and provides pointers to enable the reader to explore thetheory and research. This manual recognises the wide-ranging impact of mental illnessand its ramifications on daily life, and promotes a recovery modelof psychosocial rehabilitation and aims to empower clinicians toengage their clients in tailored rehabilitation plans. The book isdivided into five key sections. Section 1 looks at assessment covering tools available in thepublic domain, instruments, scoring systems, norms and applicationsfor diagnosis and measurement of symptoms, cognitive functioning,impairment and recovery. Section 2 covers the full range of therapeutic interventions andoffers advice on training and supervision requirements andevaluation of process, impact and outcome. Section 3 provides manuals and programs for interventionseffectively provided as group activities. Section 4 explains how to design a full programme thatintegrates therapeutic interventions with group programmes as wellas services provided by other agencies. The final section looks at peer support and self help, providingmanuals and resources that support programmes and interventions notrequiring professional or practitioner direction.

Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurerehabilitation.

Explores new applications emerging from our latestunderstanding of proteins in solution and at interfaces Proteins in solution and at interfaces increasingly serve as thestarting point for exciting new applications, from biomimeticmaterials to nanoparticle patterning. This book surveys the stateof the science in the field, offering investigators a currentunderstanding of the characteristics of proteins in solution and atinterfaces as well as the techniques used to study thesecharacteristics. Moreover, the authors explore many of the new andemerging applications that have resulted from the most recentstudies. Topics include protein and protein aggregate structure;computational and experimental techniques to study proteinstructure, aggregation, and adsorption; proteins in non-standardconditions; and applications in biotechnology. Proteins in Solution and at Interfaces is divided intotwo parts: Part One introduces concepts as well as theoretical andexperimental techniques that are used to study protein systems,including X-ray crystallography, nuclear magnetic resonance, smallangle scattering, and spectroscopic methods Part Two examines current and emerging applications,including nanomaterials, natural fibrous proteins, and biomolecularthermodynamics The book's twenty-three chapters have been contributed byleading experts in the field. These contributions are based on athorough review of the latest peer-reviewed findings as well as theauthors' own research experience. Chapters begin with a discussionof core concepts and then gradually build in complexity, concludingwith a forecast of future developments. Readers will not only gain a current understanding of proteinsin solution and at interfaces, but also will discover howtheoretical and technical developments in the field can betranslated into new applications in material design, geneticengineering, personalized medicine, drug delivery, biosensors, andbiotechnology.
