Introduction to Canadian Politics Introduction to Canadian Government

Canadian public administration has provided a rich ground for examining the changing nature of the state. Currents of political change have rippled through the administration of the public sector, often producing significant alterations in our understanding of how best to organize and administer public services. This volume brings together some of the leading Canadian and international scholars of public administration to reflect on these changes and their significance. Providing a historical perspective on public administration in Canada, the volume examines the shift from a traditional model of administration to newer forms such as new public management and governance, and explores current debates and the place of Canadian public administration within a broader comparative perspective.

This book offers a comprehensive overview of Canadian cultural policy and research, at a time of transition and redefinition, to establish a dialogue between conventional and emerging foundations. Taking a historical view, the book informs insights on

File Type PDF Canadian Government In Transition

current trends in policy and explores global debates underpinning cultural policy studies within a local context. The book first acknowledges what Canadian cultural policy research conventionally recognizes and refers to in terms of institutions, values, and debates, before moving on to take stock of the transformations that are continuing to reshape Canadian cultural policy in terms of values, orientations, actors, and institutions. With a focus on all levels of government-- federal, provincial, and local -- the book also centers on Indigenous arts policies and practices. This systematic and inclusive volume will appeal to academic researchers, graduate students, managers of arts and culture programs and institutions, and in the areas of cultural policy, public administration, political science, cultural studies, film and media studies, theatre and performance, and museum studies.
