These volumes present the Budget Message of the President & information on his budget proposals. The report also contains detailed information on the various appropriations & funds, & highlights significant presentations of data. Statistics are provided for the following: budget receipts, outlays, & surpluses or deficits over an extended time period.

This book explains the financial appraisal of capital budgeting projects. The coverage extends from the development of basic concepts, principles and techniques to the application of them in increasingly complex and real-world situations. Identification and estimation (including forecasting) of cash flows, project appraisal formulae, and the application of net present value (NPV), internal rate of return (IRR) and other project evaluation criteria are illustrated with a variety of calculation examples. Risk analysis is extensively covered by the use of risk adjusted discount rate, certainty equivalent, sensitivity, simulation and Monte Carlo analysis. The NPV and IRR models are further applied to forestry, property and international investments. Resource constraints are introduced to the capital budgeting decisions with a variety of worked examples using linear programming technique. All calculations are extensively supported by Excel workbooks on the Web, and each chapter is well reviewed by end of chapter questions.

Capital investment decisions are a constant challenge to all levels of financial managers. Capital Budgeting: Theory and Practice shows you how to confront them using state-of-the-art techniques. Broken down into four comprehensive sections, Capital Budgeting: Theory and Practice explores and illustrates all aspects of the capital budgeting decision process. Pamela Peterson and Frank Fabozzi examine the critical issues and limitations of capital budgeting techniques with an in-depth analysis of: Classifying capital budgeting proposals Determining the relevant cash flows for capital budgeting proposals Assessing the economic value of a capital budgeting proposal using different techniques Incorporating risk into the capital budgeting decision Evaluating whether to lease or borrow-to-buy Capital Budgeting: Theory and Practice provides the knowledge, insight, and advice that will allow you to handle one of the most important aspects of your firm's financial management. Advanced enough for practitioners yet accessible enough for the novice, Capital Budgeting: Theory and Practice is your complete guide to understanding and benefiting from the essential techniques of capital budgeting.
