Chevrolet Captiva check engine warning light - if the engine symbol is illuminated in your Chevrolet Captiva during normal operating conditions, it indicates a serious fault/malfunction in the engine system. In most cases the fault will be caused by a broken/faulty sensor like o2 sensor, map sensor, maf sensor, camshaft sensor or other.

Chevrolet Captiva Car Warning Lights - Diagnostic World

The Chevrolet Captiva / Holden Captiva engine warning light, also known as engine malfunction lamp (MIL) comes on if a fault exists in the emission related components or related sub systems. The check engine light will remain on as long as the Engine Control Module (ECM) detects the fault.

Chevrolet Captiva / Holden Captiva Dash Warning Lights ...

Here are some of the most typical problems that can make your Captiva's reduced engine power warning come on: Throttle Body. This is one of the most common reasons the reduced engine power light comes on. If the ECU isn't getting the proper voltage response from the throttle body, it can't be sure of how much it'll really accelerate your Captiva from the gas pedal input. At this point, it turns on the reduced engine power mode in order to keep the vehicle from running away from you ...

Chevy Captiva: Reduced Engine Power Diagnosis | Drivetrain ...

Two weeks ago the engine light in my 2010 Holden Captiva came on and stayed on. I bought it last October and took it back to the used car dealer I bought it from to get it fixed. They plugged a computer in to it and reset it. The guy said it should be ok now, and that it was probably caused by a bad batch of petrol, but it came on again.

Holden Captiva 2010: Engine light - FAQ | CarsGuide

Turn the ignition key to the "ON" position without starting the engine. If your vehicle has an ignition button, press and holds the Engine Start/Stop button for 5 seconds without touching the brake pedal. Fully press and release the accelerator pedal to the floor slowly 3 times within five seconds. If the OIL Light blinks, the system is resetting

2013-2018 Holden Captiva Engine Oil Service Light Reset ...

A blinking light indicates a critical problem with gaseous emissions from the engine that is likely to cause permanent damage to the engine, exhaust system or catalytic converter. A blinking light must be remedied immediately, and the car should not be driven in this state, at the risk of causing serious and permanent damage to the engine, exhaust and/or catalytic converter.

SOLVED: Emission control light is on Holden Captiva, could ...

Your engine management light may come on if there is a fault with your DPF - a filter that captures and stores exhaust soot and essentially helps make your diesel engine less polluting.

How to reset your engine management light | startrescue.co.uk

If the engine isn't able to burn the soot due to a short trip, the computer will then turn on the filter warning light to warn the driver that the soot level is building up. When you first see the light, you can resume normal driving, but when you get a chance, take the car onto the highway and drive it for around 10 minutes at 40+ MPH.
