Camera. You could run a coax wire and separate power wires but most CCTV professionals choose to use “ Siamese Cable”. Siamese Cable is a manufactured coax cable with a set of power wires attached to it.

CCTV Installation and Wiring Options

A CCTV video camera creates synchronization pulses to lock the viewing monitor on the picture. These pulses occur at a rate of 15,750 times a second. There is one synchronization pulse or (sync pulse) for each line in the picture frame. The sync pulse tells the video monitor to start drawing a video line across the picture screen.
