Chapter 14 Waves and Sounds

Q.3P The speed of surface waves in water decreases as the water becomes shallower. Suppose waves travel across the surface of a lake with a speed of  $2.0 \text{ m/s}$  and a wavelength of  $1.5 \text{ m}$ . When these waves move into a shallower part of the lake, their speed decreases to  $1.6 \text{ m/s}$ , though their frequency remains the same.
