Russia

By analysing the experience of Finland, Risto Alapuro shows how upheavals in powerful countries shape the internal politics of smaller countries. This linkage, a highly topical subject in the twenty-first century world, is concretely studied by putting the abortive Finnish revolution of 1917-18 into a long historical and a broad comparative perspective.

## Section 1 Revolutions In

Russia  
transportation expert Dan Sperling and his collaborators share research-based insights on potential public benefits and impacts of the three transportation revolutions of vehicle automation, shared mobility, and vehicle electrification. They describe innovative ideas and partnerships, and explore the role government policy can play in steering the new transportation paradigm toward the public interest--toward our dream scenario of social equity, environmental sustainability, and urban livability. Three Revolutions offers policy recommendations and provides

Russia and complexity from any that have come before.

Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200

Russia stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil

**Russia** and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

It was here that Lenin justified his personal interpretation of Marxism, savaged his opponents and set out his trenchant views

### Section 1 Revolutions In

**Russia** Drawing on a catalogue of more than 8,000 protest events, as well as interviews, video footage and still photographs, Neil Ketchley provides the first systematic account of how Egyptians banded together to overthrow Husni Mubarak, and how old regime forces engineered a return to authoritarian rule. Eschewing top-down, structuralist and culturalist explanations, the author shows that the causes and consequences of Mubarak's ousting can only be understood by paying close attention to the evolving dynamics of contentious politics
