Marshalls CPM is able to offer a range of precast concrete standard cover slabs in BIM (Building Information Modelling) which is now a requirement for all government construction projects. Temporary manhole covers available upon request. For sales into England and Wales please call 01179 814500 or email salesemail@marshalls.co.uk

Heavy Duty Cover Slabs - Marshalls CPM

Manhole covers, also known as inspection chamber covers, are a common sight in the ground; they prevent entry to drainage inspection chambers and provide access to below ground sewerage and surface water systems. These covers have a range of different applications, such as outdoor drain covers, fire hydrant surface boxes and stop tap access boxes.

According to one study, there are more than 250 races of corn in about 14 racial groups. Maize or Corn products have got tremendous demand in India and in overseas countries. Now-a-days many eatable products are being produced from maize. To consider the demand of these products EIRI have recently published a unique book on its subjects. The book 'Technology of Maize and Allied Corn Products' covers various methods including Corn, Types of Corn, Botany of Corn, Cultivation Practices, Carbohydrates and Related Compounds, Quality Factors, Traditional Food Products from Corn, Corn Milling, Products and their Uses, Processing Ready-to-Breakfast Cereals, Popcorn, Formulated Puffed Snacks, Manufacturing Corn Chips, Maize Products, Maize Starch, Sweet Corn, Baby Corn, Extruding Snacks, Corn Flakes, Liquid Glucose, Maize/Corn Oil, Malto Dextrin from Maize, Plant Economics of Non-Roasted Corn Flakes (POHA), Starch from Maize, Snack Food, Yeast Dry Powder from Maize, Suppliers of Maize/Corn Processing Machineries, Present Manufacturers/Exporter/Suppliers of Maize and Maize Products

Covers foundations, paving - vehicular and pedestrian, steps and ramps, margins and edges, kerbs and wheelstops and drainage channels. The book is a reference for landscape designers

As a ready reference for landscape designers and as an indispensable time-saving tool, Landscape Detailing is an essential for the design office. Each section begins with technical guidance notes on design and construction and then provides a list of points against which specifications can be checked. This is followed by a set of drawn-to-scale details sheets. These details can be traced for direct incorporation into the set of contract drawings. A list of relevant British Standards, references, bibliography and a list of associations and institutions indicate where further guidance can be obtained.

Step-by-step procedures for planning, design, construction and operation: * Health and environment * Process improvements * Stormwater and combined sewer control and treatment * Effluent disposal and reuse * Biosolids disposal and reuse * On-site treatment and disposal of small flows * Wastewater treatment plants should be designed so that the effluent standards and reuse objectives, and biosolids regulations can be met with reasonable ease and cost. The design should incorporate flexibility for dealing with seasonal changes, as well as long-term changes in wastewater quality and future regulations. Good planning and design, therefore, must be based on five major steps: characterization of the raw wastewater quality and effluent, pre-design studies to develop alternative processes and selection of final process train, detailed design of the selected alternative, construction, and operation and maintenance of the completed facility. Engineers, scientists, and financial analysts must utilize principles from a wide range of disciplines: engineering, chemistry, microbiology, geology, architecture, and economics to carry out the responsibilities of designing a wastewater treatment plant. The objective of this book is to present the technical and nontechnical issues that are most commonly addressed in the planning and design reports for wastewater treatment facilities prepared by practicing engineers. Topics discussed include facility planning, process description, process selection logic, mass balance calculations, design calculations, and concepts for equipment sizing. Theory, design, operation and maintenance, trouble shooting, equipment selection and specifications are integrated for each treatment process. Thus delineation of such information for use by students and practicing engineers is the main purpose of this book.

The Business Year: Morocco 2020 is a portrait of the Moroccan economy as seen through the eyes of its economic decision makers. Research for this publication was carried out in a dynamic economic and political context, including a government reshuffle in October 2019, the conclusion of the First Industrial Acceleration plan, the new foundations for the 2020 Finance Bill, and the onset of the COVID-19 pandemic. This 120-page publication aims to provide a platform for the country's decision makers at a time of global uncertainty and act as a guide for investors looking seriously at the North African economy.
