To verify the ignition system is disabled, unhook only one spark plug wire and connect a spark tester to that plug wire, and to a good engine ground. Then crank the engine. If you see sparks at the tester, or the engine starts, your ignition system is not disabled. CAUTION: If your spark tester is not properly grounded, or if it falls off the ground while cranking the engine, you can damage the ignition coil and/or the ignition module. The first time you use a spark tester be sure to get ...
