Agememnon is the first part of the Aeschylus's Orestian trilogy in which the leader of the Greek army returns from the Trojan war to be murdered by his treacherous wife Clytemnestra. In Sophocles' Oedipus Rex the king sets out to uncover the cause of the plague that has struck his city, only to discover the devastating truth about his relationship with his mother and his father. Medea is the terrible story of a woman's bloody revenge on her adulterous husband through the murder of her own children.

This volume highlights problems from a range of biological and medical applications that can be interpreted as questions about system behavior or control. Topics include drug resistance in cancer and malaria, biological fluid dynamics, auto-regulation in the kidney, anti-coagulation therapy, evolutionary diversification and photo-transduction. Mathematical techniques used to describe and investigate these biological and medical problems include ordinary, partial and stochastic differentiation equations, hybrid discrete-continuous approaches, as well as 2 and 3D numerical simulation.

Study & Master Accounting Grade 10 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). The comprehensive Learner's Book includes: * case studies which deal with issues related to the real world, and move learners beyond the confines of the classroom * margin notes to assist learners with new concepts - especially GAAP flashes, that give learners guidance on General Accepted Accounting Practice * examples with solutions after the introduction of each new concept. The Teacher's File includes: * a daily teaching plan, divided into the four terms, that guides the teacher on what to teach per day and per week * moderation templates to assist teachers with assessment * solutions to all the activities in the Learner's Book. The CD-Rom with a PowerPoint presentation includes: * interactive examples to explain new concepts * links to all solutions to activities and assessments in the Learner's Book

Aircraft Glass Cockpit Operation and Maintenance is an introduction into aircraft glass cockpit systems. The book is written for all technicians who want to learn about the more complex indicating systems. If you are an A&P that desires to learn more about the modern aircraft they are working. Or if you are a technician from Canada or Europe this book will help you with the Advanced Avionics segment for certification. This book will help anyone who wants to learn more about how all of the navigation and indicating flight systems "talk" to each other or just to look into the complication world of a modern aircraft cockpit. This book covers how a cathode ray tube works and the new light emitting diode and liquid crystal display systems. In this book, you will also learn about the new heads-up guidance systems that are now becoming standard in large aircraft. This book begins with the progression of glass displays into cockpits to how these complicated systems communicate with the crew and the aircraft flight management systems. Starting with the cathode ray tube, to liquid crystal to light emitting diodes this book teaches how these displays operate and how they might fail. This book will provide an aircraft general familiarization courses on the glass instrument indicating systems for a variety of aircraft. For general aviation aircraft this book covers the Garmin g 1000 system for air carrier aircraft there are sections for the Boeing 757 and 737 or the Bombardier CRJ and Challenger indication systems. With just under 300 pages of full color 8 1/2 by 11 this book is full of drawings and diagrams to help visualize, in simple terms, the complex systems that are becoming standard for aircraft manufactured today.
