Understand DBT-informed art therapy, and how to apply it to your practice. Dialectical Behavior Therapy (DBT) treats problems with emotion regulation, and is especially effective in treating chronic self-harming and suicidal behaviors associated with Borderline Personality Disorder.

~~DBT-Informed Art Therapy: Mindfulness, Cognitive Behavior~~

DBT is used in conjunction with art therapy techniques by many art therapists. Art exercises provide an avenue for exploring personal experiences without judgment or the need to filter experiences through to the art therapist. Art therapy and DBT utilize psychotherapy principles which help form common threads between the two therapeutic approaches.

~~DBT-Informed Art Therapy: Mindfulness, Cognitive Behavior~~

There is a meeting of mindfulness and therapy in: Mindfulness- Based Cognitive Therapy (MBCT), Dialectical Behavioural Therapy (DBT) and Acceptance and Commitment Therapy (ACT). This suggests a value in the integration of mindfulness in existing modalities and provides a reference point as we consider the integration of art therapy and mindfulness.
