Development  
Rapid application

# Download Free Definition Of

Rapid Application Development (RAD) is a suite of software development methodology techniques used to expedite software application development. RAD uses predefined prototyping techniques and tools to produce software applications. It encompasses a graphical user interface (GUI) development environment, allowing

# Download Free Definition Of

end users to easily drag and drop required software application components.

## Model In

What is Rapid  
Application

Development (RAD)? -  
Definition ...

Rapid-application development (RAD), also called rapid-application building (RAB), is both a general

# Download Free Definition Of

term for adaptive software development approaches, and the name for James Martin 's approach to rapid development. In general, RAD approaches to software development put less emphasis on planning and more emphasis on an adaptive process.

Rapid application
