A Practical Guide to Computer Forensics Investigations introduces the newest technologies along with detailed information on how the evidence contained on these devices should be analyzed. Packed with practical, hands-on activities, students will learn unique subjects from chapters including Mac Forensics, Mobile Forensics, Cyberbullying, and Child Endangerment. This well-developed book will prepare students for the rapidly-growing field of computer forensics for a career with law enforcement, accounting firms, banks and credit card companies, private investigation companies, or government agencies.

Covers receipts and expenditures of appropriations and other funds.

The book examines the performance and optimization of systems where queueing and congestion are important constructs. Both finite and infinite queueing systems are examined. Many examples and case studies are utilized to indicate the breadth and depth of the queueing systems and their range of applicability. Blocking of these processes is very important and the book shows how to deal with this problem in an effective way and not only compute the performance measures of throughput, cycle times, and WIP but also to optimize the resources within these systems. The book is aimed at advanced undergraduate, graduate, and professionals and academics interested in network design, queueing performance models and their optimization. It assumes that the audience is fairly sophisticated in their mathematical understanding, although the explanations of the topics within the book are fairly detailed.

With current advancements in the modeling and simulation of systems and networks, researchers and developers are better able to determine the probable state of current systems and envision the state of future systems during the design stage. The uses and accuracies of these models are essential to every aspect of communication systems. Integrated Models for Information Communication Systems and Networks: Design and Development explores essential information and current research findings on information communication systems and networks. This reference source aims to assist professionals in the desire to enhance their knowledge of modeling at systems level with the aid of modern software packages.

Now in its 7th edition, Marketing Plans is a highly renowned international bestseller. The book has been thoroughly revised, and every chapter has been carefully updated with special attention to the latest developments in marketing. To accomplish this, Professor Malcolm McDonald has been joined in this edition by Professor Hugh Wilson, a leading expert on CRM and multichannel strategy as well as marketing planning. Major changes to this edition include new chapters based on the very latest research on: Planning for integrated marketing communications and digital marketing Developing multichannel strategy Developing the CRM plan Marketing effectiveness and accountability Marketing Plans is designed as a tool and a user-friendly learning, resource. Every point illustrated by powerful practical examples and made actionable through simple, step-by-step templates and exercises. The book is established as essential reading for all serious professional marketers and students of marketing, from undergraduate and postgraduate to professional courses for bodies such as CIM. Above all it provides a practical, hands-on guide to implementing every single concept included in the text. "It is clearly and powerfully written and is probably the best book on the theory and practice of marketing planning ever written. It is a best-seller in Europe and I strongly recommend

the book to anyone with an interest in marketing planning." "Warren J. Keegan, Professor of International Business and Marketing Director, Institute for Global Business Strategy, Pace University, New York "I am extremely impressed by the step lucidity of what is presented." "Dr D. H. Eaton, North Carolina University "A book reaching the quantities sold of Marketing Plans must be a book that is really used. It is not difficult to see why. Malcolm McDonald writes about what to do in marketing and how to do it. Unlike many academic marketing writers, he will never let you forget that marketing ends with "ing." "Kenneth Simmonds, Professor of Marketing and International Business, London Business School "Malcolm McDonald is clearly one of the most respected Professors of Marketing in Europe and the author of a number of outstanding books. The fact that Marketing Plans has been such a massive seller offers testimony of this. McDonald writes with clarity and insight that is becoming increasingly rare today. It is powerful, up to date and has proved that it works. I recommend it to you!" "John D. Ryans, Jr, Bridgestone Professor of International and Professor of International Marketing, Kent State University, Ohio
