An unusual book that explains how dogs were used by the Spaniards to help their conquest of Latin America.

A compelling historical analysis of the pivotal events of the year 1492 focuses on the role of the Spanish Inquisition in strengthening the power of King Ferdinand and Queen Isabella, the campaign against Moorish occupation, the expulsion of the Spanish Jews, and the beginning of the Spanish conquest of the New World. Reprint. 25,000 first printing.

The perfect gift for dog lovers and readers of Inside of a Dog by Alexandra Horowitz—this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets. Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In their New York Times bestselling book The Genius of Dogs, husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends. Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique in the animal kingdom. This dog genius revolution is transforming how we live and work with dogs of all breeds, and what it means for you in your daily life with your canine friend.

Award-winning author of Under the Feet of Jesus, Helena María Viramontes offers a profoundly gritty portrait of everyday life in L.A. in this lyrically muscular, artfully crafted novel. In the barrio of East Los Angeles, a group of unbreakable young women struggle to find their way through the turbulent urban landscape of the 1960s. Androgynous Turtle is a homeless gang member. Ana devotes herself to a mentally ill brother. Ermila is a teenager poised between childhood and political consciousness. And Tranquilina, the daughter of missionaries, finds hope in faith. In prose that is potent and street tough, Viramontes has choreographed a tragic dance of death and rebirth. Julia Alvarez has called Viramontes "one of the

important multicultural voices of American literature." Their Dogs Came with Them further proves the depth and talent of this essential author. Helena María Viramontes is the acclaimed author of *The Moths and Other Stories* and *Under the Feet of Jesus*, a novel; and the coeditor, with María Herrera-Sobek, of two collections: *Chicana (W)Rites: On Word and Film and Chicana Creativity and Criticism*. She is the recipient of the 2006 Luis Leal Award and the John Dos Passos Award for Literature, and her short stories and essays have been widely anthologized and adopted for classroom use and university study. Viramontes lives in Ithaca, New York, where she is a professor in the Department of English at Cornell University.

An update of a popular work that takes on the myths of the Spanish Conquest of the Americas, featuring a new afterword. *Seven Myths of the Spanish Conquest* reveals how the Spanish invasions in the Americas have been conceived and presented, misrepresented and misunderstood, in the five centuries since Columbus first crossed the Atlantic. This book is a unique and provocative synthesis of ideas and themes that were for generations debated or perpetuated without question in academic and popular circles. The 2003 edition became the foundation stone of a scholarly turn since called *The New Conquest History*. Each of the book's seven chapters describes one "myth," or one aspect of the Conquest that has been distorted or misrepresented, examines its roots, and explodes its fallacies and misconceptions. Using a wide array of primary and secondary sources, written in a scholarly but readable style, *Seven Myths of the Spanish Conquest* explains why Columbus did not set out to prove the world was round, the conquistadors were not soldiers, the native Americans did not take them for gods, Cortés did not have a unique vision of conquest procedure, and handfuls of vastly outnumbered Spaniards did not bring down great empires with stunning rapidity. Conquest realities were more complex--and far more fascinating--than conventional histories have related, and they featured a more diverse cast of protagonists--Spanish, Native American, and African. This updated edition of a key event in the history of the Americas critically examines the book's arguments, how they have held up, and why they prompted the rise of a *New Conquest History*.

In this paperback edition is a foreword by activist and author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by *VegNews Magazine*, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever.

During the nineteenth century, Americans looked to the eventual civilization and assimilation of Native Americans through a process of removal, reservation, and directed culture change. Underlying American Indian policy was a belief in a developmental stage theory of human societies in which agriculture marked the passage between barbarism and civilization. Solving the "Indian Problem" appeared as simple as teaching Indians to settle down and farm and then disappear into mainstream American society. Such policies for directed subsistence change and incorporation had far-reaching social and environmental consequences for native peoples and native lands. This study explores the experiences of three groups - Northern Utes, Hupas, and Tohono O'odhams - with settled reservation and allotted agriculture in the nineteenth and twentieth centuries. Each group inhabited a different environment, and their cultural traditions reflected distinct subsistence adaptations to life in the western United States. Each experienced the full weight of federal agrarian policy yet responded differently, in culturally consistent ways, to subsistence change and the resulting social and environmental consequences. Attempts to establish successful agricultural economies ultimately failed as each group reproduced its own cultural values in a diminished and rapidly changing environment. In the end, such policies and agrarian experiences left Indian farmers economically dependent and on the periphery of American society.
