business and educational goals. But in order to implement an E-Learning program, you'll have to wade through hundreds of learning management systems, learning content management systems, authoring schools, and collaboration environments to determine what solution will work best for your situation. In this in-depth book, recognized E-Learning experts William and Katherine Horton survey the entire field of E-Learning tools for you. They provide you with a systematic way to identify, evaluate, and choose products and services based on different E-Learning scenarios. In this no-holds barred look at E-Learning tools, the authors: *

- * Arm you with a complete list of questions to ask vendors before you commit to a product
- * Describe

product limitations throughout each chapter and include special Rant sections that you must read * Present tips and tricks as well as common mistakes to avoid * List potential vendors and contact information by tool category The companion Web site contains design forms, checklists of features to look for in the various tool categories, spreadsheets, and lists of specific tools and vendors.

Multimedia-Based Instructional Design is a thoroughly revised and updated second edition of the best-selling book that provided a complete guide to designing and developing interactive multimedia training. While most training companies develop their training programs in many different technological delivery media—computer-based,

web-based, and distance learning technologies—this unique book demonstrates that the same instructional design process can be used for all media. Using just one process reduces cycle time for course development—and also reduces costs.

e-Learning Ecologies explores transformations in the patterns of pedagogy that accompany e-learning—the use of computing devices that mediate or supplement the relationships between learners and teachers—to present and assess learnable content, to provide spaces where students do their work, and to mediate peer-to-peer interactions. Written by the members of the "new learning" research group, this textbook suggests that e-learning ecologies may play a key part in

shifting the systems of modern education, even as technology itself is pedagogically neutral. The chapters in this book aim to create an analytical framework with which to differentiate those aspects of educational technology that reproduce old pedagogical relations from those that are genuinely innovative and generative of new kinds of learning. Featuring case studies from elementary schools, colleges, and universities on the practicalities of new learning environments, *e-Learning Ecologies* elucidates the role of new technologies of knowledge representation and communication in bringing about change to educational institutions.

Praise for Designing Web-Based Training "Horton has done it again! He's addressed the cutting-edge problem of Web-based training design with his pragmatic, research-based approach. His work is task-oriented and down-to-earth. He doesn't waste our time with excessive educational philosophy. In short-comprehensive overview, practical advice, engaging presentation."-Robert E. Horn, Author, Visual Language: Global Communication for the 21st Century "As each new media wave is adopted for instructional purposes, there is a lag in effective exploitation of the unique features the medium brings for supporting learning. Designing Web-Based Training bridges the gap by providing a rich and detailed reference."-Ruth Clark, EdD,
