Featuring a beautiful new design, THE EARTH AND ITS PEOPLES, Sixth Edition, presents world history in a balanced, global framework, shifting the focus away from political centers of power. This truly global text for the world history survey course employs fundamental themes of "environment and technology" and "diversity and dominance" to explore patterns of humans' interactions with their surroundings and with each other. The authors' approach reveals how humanity continues to shape and be shaped by the environment and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Highly acclaimed in their fields of study, the authors bring a wide array of expertise to the program. A combination of strong scholarship and detailed pedagogy gives the book its reputation for rigor and student accessibility. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Readable and concise, this Brief Edition of THE EARTH AND ITS PEOPLES: A GLOBAL HISTORY provides the essential narrative of world history in an abbreviated format. This global text employs the fundamental themes of "environment and technology" and "diversity and dominance" to explore patterns of humans' interactions with their surroundings and with each other. The authors' approach shifts the focus away from political centers and power, revealing how humanity continues to shape and be shaped by our environments, and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Available in the following split options. THE EARTH AND ITS PEOPLES, Brief Sixth Edition (Chapters 1-30), ISBN: 978-1-285-44551-9, Volume I. To 1550 (Chapters 1-15), ISBN: 978-1-285-44552-6, Volume II. Since 1500 (Chapters 15-29), ISBN: 978-1-285-44553-3. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Contains learning objectives, chapter outlines (with space for students' notes on particular sections), key-term identifications, short answer and essay questions, map exercises, and "comparison charts" which help students organize the information about different cultures and events discussed in each chapter.

Taureans, ever wondered what the Sun-signs tell you about love and life? This unique anthology of poems for love and life relates directly to your Sun-sign, Taurus. If you were born between the 21st of April and the 21st of May, you will relate to many of the themes identified with your sign's characteristics and personality traits. The poems in this collection have been chosen because they reflect a Taurean attitude to life. They appeal to the interests 'ruled' by your sign: the animals, flowers, trees, plants and places celebrated by the poets and associated with the sign of Taurus over three thousand years of traditional astrology. Some have been chosen simply because we believe you will enjoy them, and that they will awaken or re-awaken your love of poetry.

"Old maps lead you to strange and unexpected places, and none does so more inelectually than the subject of this book: the giant, beguiling Waldseem\u00fcller world map of 1507." So begins this remarkable story of the map that gave America its name. For millennia Europeans believed that the world consisted of three parts: Europe, Africa, and Asia. They drew the three continents in countless shapes and sizes on their maps, but occasionally they hinted at the existence of a "fourth part of the world," a mysterious, inaccessible place, separated from the rest by a vast expanse of ocean. It was a land of myth\u2014until 1507, that is, when Martin Waldseem\u00fcller and Matthias Ringmann, two obscure scholars working in the mountains of eastern France, made it real. Columbus had died the year before convinced that he had sailed to Asia, but Waldseem\u00fcller and Ringmann, after reading about the Atlantic discoveries of Columbus's contemporary Amerigo Vespucci, came to a startling conclusion: Vespucci had reached the fourth part of the world. To celebrate his achievement, Waldseem\u00fcller and Ringmann printed a huge map, for the first time showing the New World surrounded by water and distinct from Asia, and in Vespucci's honor they gave this New World a name: America. The Fourth Part of the World is the story behind that map, a thrilling saga of geographical and intellectual exploration, full of outsize thinkers and voyages. Taking a kaleidoscopic approach, Toby Lester traces the origins of our modern worldview. His narrative sweeps across continents and centuries, zeroing in on different portions of the map to reveal strands of ancient legend, Biblical prophecy, classical learning, medieval exploration, imperial ambitions, and more. In Lester's telling the map comes alive: Marco Polo and the early Christian missionaries trek across Central Asia and China, Europe's early humanists travel to monastic libraries to recover ancient texts, Portuguese merchants round up the first West African slaves, Christopher Columbus and Amerigo Vespucci make their epic voyages of discovery, and finally, vitally, Nicholas Copernicus makes an appearance, deducing from the new geography shown on the Waldseem\u00fcller map that the earth could not lie at the center of the cosmos. The map literally altered humanity's worldview. One thousand copies of the map were printed, yet only one remains. Discovered accidentally in 1901 in the library of a German castle it was bought in 2003 for the unprecedented sum of \$10 million by the Library of Congress, where it is now on permanent public display. Lavishly illustrated with rare maps and diagrams, The Fourth Part of the World is the story of that map: the dazzling story of the geographical and intellectual journeys that have helped us decipher our world.
