In this foundational book, Frederick M. Hess and Max Edén bring together a cross-section of respected academics and journalists to examine key aspects of the Every Student Succeeds Act (ESSA). This volume provides a thematic and in-depth analysis of the central provisions of this landmark legislation, presenting a range of perspectives. The contributors—leading researchers, policy analysts, and journalists—explore the conflicts and compromises that shaped the emerging

Law, outline its core provisions, and trace its implications for urban districts, states, and the federal government. Complementing these descriptions are chapters presenting opposing viewpoints on the law's merits and its ramifications for future reform efforts. Enacted in December 2015, ESSA represents a major shift of the federal role in education, and its provisions touch on almost every aspect of education policy. Yet it arrived in something of a whirlwind, and scholars, advocates, and policy makers are struggling to make sense of this new

act. By bringing together leading thinkers to make sense of this important law, The Every Student Succeeds Act provides a solid foundation for scholars, advocates, and policy makers as they begin to navigate a new era in education policy.

Environmental education (EE) and education for sustainable development (ESD) are asserting their growing role in curricula around the world, yet how deeply embedded are they in the learning systems of the Pacific nations? Building on an earlier analysis in China and Taiwan, this volume expands its purview to

examine the quality and extent of environmental and sustainable development education in a number of countries in the Asia-Pacific region, including China itself, Taiwan, South Korea, Japan and Indonesia. As well as offering detailed national analyses provided by Asian-Pacific academics and professionals, this work includes examples in the US and Canada and an introduction that assesses the contrasting challenges and positive commonalities among diverse education systems. The chapters reflect leading-edge practice, innovation, and depth of experience and at

the same time as detailing locally relevant and culturally appropriate strategies they also provide clear models and strategies for expanding the application and influence of education for sustainable development elsewhere. In doing so, they mirror the global nature of environmental issues as well as the local nature of the solutions.

size and scope. Many of these programs were discussed in the popular NBER book, "Means-Tested Transfer Programs in the United States," published in 2003. This new book sheds light on changes in programs and the results of new research since the first volume. Each volume of "Economics of Means-Tested Transfer Programs in the United States" explores four programs in particular. This first volume looks into the more prominent transfer programs, which include Medicaid, the Earned-Income Tax Credit, Food and Nutrition, and Temporary Assistance for Needy

Latin American and Caribbean countries are the most urban in the developing world and have very high home ownership rates. However,

many of the region's inhabitants are still poorly housed. This book examines three key contributing issues: high housing prices relative to family income, lack of access to mortgage credit, and high land prices.

This book is open access under a CC BY-NC-ND 3.0 IGO license. The Early Years analyzes the development of Latin American and Caribbean children and makes a compelling case for government intervention in what is instinctively a family affair. Spending on effective programs for young children is an investment

that, if done well, will have very high returns, while failure to implement such programs will lower the returns on the hefty investments being made in primary, secondary, and higher education. Policies for young children belong at the core of a country's development agenda, alongside policies to develop infrastructure and strengthen institutions. However, if the services provided (or funded) by governments are to benefit children, they must be substantially better than what is currently being delivered in the region. This book offers suggestions

for improving public policy
in this critical area.

In this landmark volume, Greg J. Duncan and Richard J. Murnane lay out a meticulously researched case showing how—in a time of spiraling inequality—strategically targeted interventions and supports can help schools significantly improve the life chances of low-income children. The authors offer a brilliant synthesis of recent research on inequality and its effects on families, children, and schools. They describe the interplay of social and economic factors that has

made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low- and high-income students. Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low-income children from prekindergarten through high school. All of these programs are research-tested and have demonstrated sustained effectiveness over time and at significant scale. Together, they offer a powerful vision of what good instruction in effective schools can look like. The authors conclude
