New schools of economic thought are emerging built on a more accurate analysis of the way economic agents behave and the way decisions are really made. These heterodox schools of economic thought dismiss notions of rational economic agents and profit-maximising firms in favour of a greater focus on psychology, interactions and history. Complexity economics emphasises the power of networks ...

In this first of a series of essays on the economic way of thinking, I have defined economics as the basic study of human action, that is, of conscious, purposeful human behavior. I have identified the two main elements in any economic study as scarcity and choice. The unavoidable presence of scarcity in human life forces human beings to rank their available options and make conscious choices ...

"(A) new book by Duflo and co-author Abhijit Banerjee, Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty, will once more turn the spotlight on actions to tackle poverty. The book aims to make 2011 the year that the "economics of poverty" become a key part of international political discussions." --The Guardian Online
