Labor Market Trends Chapter 9 Section 1 | slideum.com

Employment equals L units of labor per period. An individual firm takes that wage as given; it is the supply curve s_1 facing the firm. This wage also equals the firm's marginal factor cost. The firm hires l units of labor, a quantity determined by the intersection of its marginal revenue product curve for labor MRP_l and the supply curve s_1 . We use lowercase letters to show quantity for a single firm and uppercase letters to show quantity in the market.
