How to Reset a Check Engine Light: 7 Steps (with Pictures)

Check Engine light comes on only when it's cold out. Hi. I have a 1998 Chevrolet Cavalier with a 2.2 liter 4 cylinder engine and an automatic transmission. When it's quite cold out, the "Check Engine" light comes on on my dash board. I phoned up a guy I take my car to for repairs, and he told me to bring the car to his place the following Monday. Over the weekend, the Check Engine light went off, but I figure that the fault code would still be stored in the computer's memory, so I brought ...

Check Engine light comes on only when it's cold out ... Your Nissan check engine light should come on under normal operation when you insert the key in the ignition. After 5 seconds or once you start the engine, the light should turn off as long as no fault codes are present. If the check engine light stays on, the problem can be something as simple as a loose gas cap or a faulty oxygen sensor.

Check engine light comes on after I fill up my gas tank ...

If the engine oil level is low, this is causing the oil warning light to flicker. This is most likely what is responsible for the occasional flickering of the oil warning light. More specifically, a low oil level will cause the oil pressure inside the engine to temporarily drop. When this happens, the warning light will flicker.
