...

The muscle pain present in both fibromyalgia (FM) and myofascial pain syndrome (MPS) is why these two conditions are sometimes mistaken for one another or erroneously lumped together as one condition. □ □

While FM and MPS do resemble each other, they can be easily distinguished through a careful medical history and physical exam—and a correct diagnosis is a key to moving forward with an effective treatment plan.

People sometimes misunderstand myofascial pain with fibromyalgia pain. Some people even consider this pain as a subcategory of fibromyalgia. Myofascial pain mainly involves pain in some focused muscles of your body. On the contrary, fibromyalgia involves pain throughout the body including chronic fatigue and other vast symptoms.

Fibromyalgia is also known as chronic "widespread pain." This type of pain is frequently felt in all four limbs and in the trunk. The American College of Rheumatology classifies chronic widespread pain as fibromyalgia if it is also accompanied by the definite existence of at least 11 out of 18 (pre-identified) tender points.

~~Myofascial Pain Syndrome vs. Fibromyalgia |
Psychology Today~~

Myofascial pain syndrome should not be confused with fibromyalgia, which has similar symptoms. Fibromyalgia is a chronic condition that causes pain and tenderness throughout the body — not just in particular areas — and does not include trigger points. For more information, see the [Made for This Moment fibromyalgia](#) page.
