Documents The Kidde i5000 is an AC/DC powered, ionization smoke alarm that operates on a 120V power source with 9V alkaline battery backup. This alarm uses ionization sensing technology. Ionization sensing alarms may detect invisible fire particles (associated with flaming fires) sooner than photoelectric alarms.

FireX recommends replacing the battery in the smoke alarm at least once a year to ensure proper operation. Only use new 9-volt batteries as replacements. Do not use rechargeable batteries. If the unit is wired to electrical power, a problem with the power supply can lead to false alarms and smoke alarm chirping.
