The phrase "form follows function" was coined by architect Louis H. Sullivan in his 1896 essay "The Tall Office Building Artistically Considered." The statement refers to the idea that a skyscraper's exterior design should reflect the different interior functions. The Wainwright Building in St. Louis, Missouri, and the Prudential Building in Buffalo, New York, are two examples of skyscrapers whose form follows their functions.

posted by John Spacey, June 09, 2016. Form follows nature is an architecture and design technique that uses shapes and forms found in nature such as plants, animals, insects, geological and astronomical shapes. Such techniques may achieve highly functional designs or may be purely aesthetic as a means of integrating with natural surroundings.

Each generation of a species then finds a use for the form it has inherited. Function follows form in nature. Applying functional elements to a design is generally a more objective process than applying aesthetic elements. A functionally objective process results in designs that are timeless but may be perceived as simple and uninteresting.
