The world is ever changing and the way students experience social studies should reflect the environment in which they live and learn. Digital Social Studies explores research, effective teaching strategies, and technologies for social studies practice in the digital age. The digital age of education is more prominent than ever and it is an appropriate time to examine the blending of the digital age and the field of social studies. What is digital social studies? Why do we need it and what is its purpose? What will social studies look like in the future? The contributing authors of this volume seek to explain, through an array of ideas and visions, what digital social studies can/should look like, while providing research and rationales for why digital social studies is needed and important. This volume includes twenty-two scholarly chapters discussing relevant topics of importance to digital social studies. The twenty-two chapters are divided into two sections. This stellar collection of writings includes contributions from leading scholars like Cheryl Mason Bolick, Michael Berson, Elizabeth Washington, Linda Bennett, and many more.

Edited by the cocreator of the Guided Inquiry Design® (GID) framework as well as an educator, speaker, and international consultant on the topic, this book explains the nuances of GID in the high school context. It also addresses background research and explains guided inquiry and the information search process. □ Enables teachers, school librarians, and other educational partners to simultaneously target outcomes that bring about deep understanding and address curricular goals □ Offers a practical, concepts-based approach to inquiry learning, complete units of study in a variety of content areas, and a discussion of the role emotions in the learning process □ Includes ready-to-implement Guided Inquiry Design® (GID) lesson plans written by practicing high school librarians and teachers who have been refining their GID curricula for years □ Serves to heighten student engagement at the high school level by going beyond fact-finding to foster deeper understanding and knowledge creation □ Provides an explicit structure for developing instructional partnerships and collaborative teams within the school and with the larger community

Adventure, danger, and a thrilling global mission await 12-year-old Cruz Coronado as he joins an elite school for explorers. Cruz leaves his tranquil home in Hawaii to join 23 talented kids from around the globe to train at the Explorer Academy with the world's leading scientists to become the next generation of great explorers. But for Cruz, there's more at stake. No sooner has he arrived at the Academy than he discovers that his family has a mysterious past with the organization that could jeopardize his future. In the midst of codebreaking and cool classes, new friends and augmented reality expeditions, Cruz must tackle the biggest question of all: Who is out to get him, and why? Readers can get in on the excitement with puzzles and codes embedded throughout.

Accompanying CD-ROM contains Fast Facts checklists, data sets to support exercises, and color figures from the book.

Extremely clear and comprehensive, Computer Education for Teachers features classroom lessons, activities, and projects, over 300 clear illustrations, state-of-the-art technology developments, a chapter on multimedia, two Internet chapters, a large collection of annotated Internet Sites in each chapter, a chapter on computers in special education, an annotated recommended software listing, a summary of current computer research, and an extensive bibliography.
