Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up-to-date data on the distribution and density of species, as well as the threats to their habitats, in their ongoing attempts to conserve and monitor biodiversity. Conservation drones are low-cost, autonomous, and operator-friendly unmanned aerial vehicles that can be used for surveying, mapping, and monitoring both habitat and biodiversity. They are fast becoming a valuable complement to ground-based surveys and satellite imagery for a wide range of ecological and conservation applications. The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia. They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community. This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation.

This book discusses the latest advances in manufacturing and process control, with a special emphasis on digital manufacturing and intelligent technologies for manufacturing and industrial processes control. The human aspect of the developed technologies and products, their interaction with the users, as well as sustainability issues, are covered in detail. Development of new products using 3D printers, rapid prototyping systems, remote fabrication, and other advanced techniques, is described in detail, highlighting the state-of-the-art and current challenges. Other key topics include digital modeling systems and additive manufacturing, together with their applications in a number of fields, e.g in bioengineering/biomedicine, in the aerospace, maritime and military fields or for archeological and historical purposes, such as preserving structures, but not limited to this. The book is based on three AHFE 2018 affiliated conferences i.e. the AHFE 2018 International Conference on Advanced Production Management and Process Control, the AHFE 2018 International Conference on Human Aspects of Advanced Manufacturing, and the AHFE 2018 International Conference on Additive Manufacturing, Modeling Systems and 3D Prototyping, which were held on July 21-25, 2018, in Orlando, Florida, USA.

The HERO is GoPro's entry level camera, designed with simplicity for people who are new to using a GoPro camera. This book is written specifically for the GoPro HERO, explaining the unique features and quirks of this camera With more than 100+ images, this book provides clear, step-by-step lessons to get you out there using your GoPro HERO camera to document your adventures. This book covers everything you need to know about using your GoPro HERO camera. The book teaches you: how to operate your camera; how to choose your settings; tips for the most useful GoPro mounts, vital photography knowledge, simple photo, video and time lapse editing techniques and how to share your first edited video and photos. Through the SIX STEPS laid out in this book, you will understand your camera and learn how to use FREE software (you probably already have!) to finally do something with your results. This book is perfect for beginners, but also provides in depth knowledge that will be useful for intermediate camera users. Written specifically for the HERO camera.

Provides information on creating films using a GoPro camera, discussing the camera standard and experimental mounts, video modes, settings, and editing features, with several filmmakers discussing their experiences working with a GoPro.

Nessa edição, confira dicas incríveis para fotografar em ação! Aprenda a controlar a exposição e não perca nenhum clique nas alturas! Tudo o que você precisa saber sobre fotografia esportiva: ângulo, tempo, momento, ferramentas e muito mais! GoPro X Xtra! Descubra qual é a melhor e o que cada uma faz! Iluminação! Diferenças e contrastes de fotografar à luz do dia, em horários diferentes. Veja a adrenalina e a beleza das imagens aéreas! Equipamentos para máquinas fotográficas e muito mais! Treine seu potencial e tire as melhores fotos radicais!

FROM THE #1 AMAZON BEST SELLING AUTHOR ON GoPro CAMERAS. Specifically for the GoPro HERO 5 BLACK, this is the perfect guide book for anyone who wants to learn how to use the GoPro HERO 5 Black camera to capture unique videos and photos. With more than 100+ color images, this book provides clear, step-by-step lessons to get you out there using your GoPro HERO 5 Black camera to document your life and your adventures. This book covers everything you need to know about using your GoPro HERO 5 Black camera. The book teaches you: how to operate your camera; how to choose your settings; tips for the most useful GoPro mounts; vital photography/cinematography knowledge; simple photo, video and time lapse editing techniques and how to share your first edited video and photos. Through the SEVEN STEPS laid out in this book, you will understand your camera and learn how to use FREE software to finally do something with your results. This book is perfect for beginners, but also provides in depth knowledge that will be useful for intermediate camera users. Written specifically for the GoPro HERO5 Black camera.

Inexpensive consumer drones that offer ease of flight and high-quality photography and videography have exploded on the market recently, creating what can only be described as drone mania amongst a diverse range of potential users. Because camera-carrying drones still really only exist on the edge between hobby and the mainstream, there is still a lot of confusion about what these small drones are capable of doing. The decision to purchase one is just the first in a long stream of things a new owner must think about. Aerial Photography and Videography Using Drones is designed to help you make the most of the opportunities these nimble, affordable, and accessible flying machines have created for aerial photography and videography. Within this definitive guide, you'll learn about the following: [] the current state of camera drone equipment [] how to become a competent drone operator [] tips for getting the best aerial still images and videos [] stories from aerial photographers and videographers from around the world [] the current regulatory state for drone usage in the U.S. [] techniques demonstrated in several videos you can download from peachpit.com, along with pre-flight checklists and worksheets for flight training.

FOR HERO 3+ and HERO 3 CAMERAS. This is the perfect guide book for Adventure Sports enthusiasts who want to learn how to use their GoPro HERO 3+ or HERO 3 cameras to get great videos and photos. Snowboarders, bikers, hikers, kayakers, travelers, skiers, standup paddlers, boaters and more will find valuable knowledge with the lessons in this book. With more than 100+ images, this book provides clear, step-by-step lessons to get you out there using your GoPro camera to document your adventures. This book covers everything you need to know about using your GoPro HERO 3+ or HERO 3 camera. The book teaches you: how choose your settings; tips for all of the GoPro mounts, vital photography knowledge, simple photo, video and time lapse editing techniques and how to share your first edited video and photos. Through the SIX STEPS laid out in this book, you will understand your camera and learn how to use FREE software (you probably already have!) to finally do something with your results. This book is perfect for beginners, but also provides in depth knowledge that will be useful for intermediate camera users. Written for all editions of HERO 3+ (Black and Silver Editions) and HERO 3 (Black, Silver and White Editions) cameras.

FROM THE #1 TUTORIAL WEBSITE ON GoPro CAMERAS This Guide Book will teach you everything you need to know to create unique and engaging videos with any GoPro camera edition, from HERO3 up to HERO7. With over 130 pages of valuable information, 100+ color images and illustrations, the GoPro Handbook was rated as the most complete filmmaking guide for GoPro cameras. It provides easy to understand lessons about. [] The fundamentals of Photography & Videography [] How to choose your camera settings [] Story-telling: how to plan and create a compelling story [] Camera Gear and GoPro Accessories [] Video Production: Camera Movements, Composition and Light [] Filming Techniques: Time-Lapse, Hyper-Lapse and Slow Moton [] Tips for capturing better Photos [] Video editing tips for any software Whether you are a video enthusiast, an athlete or a traveler, this book has all the ingredients to take you from a beginner to an advanced level with GoPro. Inside, you will also find useful resources for free editing software as well as online stock music libraries for your video edits. "I'm new to GoPro and this guide was perfect for me to get started. The book provides useful information on how to make compelling videos using any GoPro, with a great focus on storytelling. It's easy to read and there are lots of tips and tricks on filming techniques and how to use the camera efficiently. I am so excited to make my first GoPro video on my next trip now." Alisha Van B, Photojournalist

This open access peer-reviewed volume was inspired by the UNESCO UNITWIN Network for Underwater Archaeology International Workshop held at Flinders University, Adelaide, Australia in November 2016. Content is based on, but not limited to, the work presented at the workshop which was dedicated to 3D recording and interpretation for maritime archaeology. The volume consists of contributions from leading international experts as well as up-and-coming early career researchers from around the globe. The content of the book includes recording and analysis of maritime archaeology through emerging technologies, including both practical and theoretical contributions. Topics include photogrammetric recording, laser scanning, marine geophysical 3D survey techniques, virtual reality, 3D modelling and reconstruction, data integration and Geographic Information Systems. The principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime archaeology within recent years and a marked increase in the use of 3D and digital approaches. This convergence of digital technologies such as underwater photography and photogrammetry, 3D sonar, 3D virtual reality, and 3D printing has highlighted a pressing need for these new methodologies to be considered together, both in terms of defining the state-of-the-art and for consideration of future directions. As a scholarly publication, the audience for the book includes students and researchers, as well as professionals working in various aspects of archaeology, heritage management, education, museums, and public policy. It will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3D recording and visualization.
