Business process modelling is referred to as a complex, time consuming, and error prone task. The correction and improvement of badly designed process models becomes increasingly expensive in the later phases of the process management life cycle. This thesis develops the principles of guided process modelling and provides a contribution towards simplifying process modelling activities. The general research question this thesis answers is what are the difficulties in the usage of process modelling tools and which methods, techniques, and tools can guide users in modelling processes to target the existing problems. The question is addressed by following a research methodology of design sciences. Amongst others, it includes a detailed analysis of the research problem, a definition of the objective, the design and development of solutions, and an evaluation of the developed concepts. In summary, the thesis presents innovative concepts to support modellers and provides a step towards end-user enablement in process modelling.

This unique Zondervan Bible Extract offers daily readings consisting of 180 selected passages, including at least one chapter from each of the Bible's 66 books. You can read both the chapter and its accompanying question-based notes that clarify the meaning of the Bible text in 15 minutes per day. With a few exceptions, the Biblical material appears in chronological order. You will read the psalms attributed to David as you read about David's life. You will read the prophets along with their background history. Portions from the Gospels, too, are interspersed, giving a composite picture of Jesus' life on earth; Paul's letters are scattered throughout the record of Jesus' life.

Differentiate math instruction using Guided Math Made Easy for grade K. This 96-page book includes large-group lessons that are paired with smaller, individualized mini-lessons at three levels of difficulty. The lessons support NCTM standards, which allows for easy integration into an existing math curriculum. The book includes reproducibles and aligns with state, national, and Canadian provincial standards.

Motor Control is the only text to bridge the gap between current motor control research and its applications to clinical practice. The text prepares therapists to examine and treat patients with problems related to balance, mobility, and upper extremity function, based on the best available evidence supporting clinical practice. The Third Edition features a new two-color design with an updated art program. This edition provides the latest research findings and their clinical applications in postural control, mobility, and upper extremity function. Drawings, charts, tables, and photographs are also included to clarify postural control and functional mobility, and laboratory activities and case studies are provided to reinforce key concepts.

Cambridge Global English is a nine-stage language-rich course for learners of English as a Second Language, following the Cambridge International Examinations curriculum framework. Teacher's Resource 2 provides step-by-step guidance notes for teachers for each lesson in every unit to support teaching the content of Learner's Book 2. Notes on Activity Book 2 are also included. A unit overview provides a snapshot of lesson objectives and the language and skills covered. The notes include answer keys to activities in the Learner's Book and Activity Book, complete audio scripts, suggestions for differentiation and assessment, cross-curricular links, portfolio opportunities and additional unit-linked photocopiable activities and unit-based wordlists.

This book constitutes the proceedings of the 27th International Conference on Advanced Information Systems Engineering, CAISE 2015, held in Stockholm, Sweden, in June 2015. The 31 papers presented in this volume were carefully reviewed and selected from 236 submissions. They were organized in topical sections named: social and collaborative computing; business process modeling and languages; high volume and complex information management; requirements elicitation and management; enterprise data management; model conceptualisation and evolution; process mining, monitoring and predicting; intra- and inter-organizational process engineering; process compliance and alignment; enterprise IT integration and management; and service science and computing. The book also contains the abstracts of 3 keynote speeches and 5 tutorials, presented at the conference.
