The ham radio works using frequencies, and it can operate via a range of them. It's even possible for those who are considered non-hams to listen in to the frequencies when using a radio scanner or receiver of their own. The frequencies that hams are able to use, because of the broad spectrum, are allocated by the FCC for amateur use.

The basic kit for your own Ham radio will cost between \$100 and \$120. A basic kit will include a UHF and VHF transmitter and receiver, as well as a programming cable, microphone and user manual. The basic kit is recommended, especially if you are going to build a Ham radio for the first time.

**How to Build a Ham Radio from Scratch - Ultimate Guide**

A step up above the single-band UHF handheld is a dual-band radio such as the Baofeng UV-5R handheld (and its many derivatives), the most popular of all Chinese and import radios. This radio sells online for anywhere from \$20 to \$35 and offers full coverage of the ham 2-meter and 440-MHz bands.

**The Ultimate Baofeng Guide for Ham Radio**

Ham radio frequencies are somewhere between these two extremes. If you've ever taken a look at a piece of ham radio gear, then you might see a cryptic number like 146.520 MHz on the display screen. This is called a frequency. It measures how fast the radio's signals are vibrating in terms of a measurement called megahertz.
