While crystal radios are simple and fun to

Download Free High Performance Crystal

build, the majority of crystal sets built today are ugly in appearance, with a bunch of wires, pins, and other components all exposed on a piece of wood. In this challenge, I have decided to take it a step further to try to build a crystal radio that (1) does not look like a kid ' s science fair projects and (2) looks

Here's a pint-sized crystal radio with enough oomph to drive a 2 1/2" speaker. This units selectivity is far better than you would expect to find in a crystal receiver

Download Free High Performance Crystal

and volume is equal to that obtained with a transistor. No external power source is required. The unusual selectivity of this radio is due to its special double-tuned circuit.

High-Power Crystal Radio

Because the Q-factor of the FM crystal

Download Free High Performance Crystal

radio is very high, as the frequency shift further away from the central frequency (e.g. 87.97Mhz or 88.03Mhz), the crystal radio appears to be off-tuned and loudness drops. When the frequency shifted back towards the centre frequency (i.e. 88Mhz), loudness increases.

A crystal radio receiver, also called a crystal set, is a simple radio receiver,

Download Free High Performance Crystal

popular in the early days of radio. It uses only the power of the received radio signal to produce sound, needing no external power. It is named for its most important component, a crystal detector, originally made from a piece of crystalline mineral such as galena. This component is now called a diode.
