P0505 2000 HONDA CIVIC Meaning. This system automatically controls engine idle speed to a specified level. Idle speed is controlled through fine adjustment of the amount of air which by-passes the throttle valve via Idle Air Control Valve (IACV) and Auxiliary Air Control (AAC) Valve. The IACV-AAC valve changes the opening of the air by-pass passage to control the amount of auxiliary air.

engine codes use this air filter XA5150. AVOID INCREASED ENGINE WEAR caused by dirty air intake filters that may allow damaging particles to get into the engine.

Amazon.com: ECOGARD XA5150 Premium Engine Air Filter Fits ...
The IACV is a common point of failure for the 1992 to 2000 era of Honda Civic. Its purpose is to meter the air flowing into the intake manifold at idle. Sometimes, the internals of this component can become dirty, affecting the closing and opening capabilities of the valve. A valve that won't open or close correctly will allow an incorrect amount of air into the engine.
