As the hospitality industry continues to grow and the business environment become ever more competitive, it must become increasingly profit and cost-conscious in order to maximize revenue and minimize costs, all while maintaining the level of service necessary for a successful operation. There is no other hospitality management accounting book on the market that combines essential information, illustrative examples, and useful problems and exercises.

This is the first text that has been developed specifically to examine what revenue managers in the hospitality industry must know and do to be successful. Numerous cases and practical examples are used to illustrate revenue

management concepts. Chapter ending questions and problems help them perform the calculations and practice the decision-making skills that are used in the field.

RM in Action shows how the revenue management principles can be clearly illustrated using real-world examples reported in various news outlets. RM on the Web offers sites listed on the Internet to provide supplemental information about a topic or issue. Revenue managers will then gain hands-on skills to effectively manage their inventories and prices.

Over the years there has been an accumulation of extensive research in management accounting. The traditional management accounting role of cost determination and financial control has been challenged and shifted to a more 'sophisticated' role of creating value through the development of 'new'

management accounting techniques and practices. This book thoroughly reviews emerging issues of management accounting research. Each issue is reviewed by experts to explain the core concept, development, current criticisms and controversies and concludes by identifying future avenues for further research. Issues covered include the transformation of the management accounting function, strategic management accounting, environmental management accounting, balanced scorecard, performance management in non-profit organizations, inter-organizational performance measurement practices between supply chain partners, beyond budgeting, activity-based approach, target costing and throughput accounting.
