The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas

The market dynamics are changing in many industries. Businesses that were powerhouses in their industry have lost their position as market leaders. Are you equipped to drive the changes it will take to be competitive in an industry where the rules are being re-written? Leaders that continuously achieve extraordinary results understand that many of the changes they need to drive are transformational. Highly effective leaders know the difference between incremental and transformational change, they know how to lead both kinds of change and they know what it takes to be a transformational change leader. When embarking on a change initiative leaders are often told that they need to go look in the mirror, that the change begins with them. This is true, but it is not very helpful advice because many people do not know what to look
